## Executive Summary

Global Blood Screening Market valued approximately USD 1.76 million in 2016 is anticipated to grow with a healthy growth rate of more than 9.7 % over the forecast period 2017-2025. Initiatives by the various organizations and governments increase awareness about donation and screening before transfusion. According to the WHO, approximately 108 million blood donations are collected every year across the globe. About 50% of these blood donations collected from high-income countries which is home to less than 20% of the total population. Hence, rising awareness coupled with the high demand for safe blood create opportunities in emerging countries. Growing numbers of blood donations and blood donors with growing consciousness about preserving donated blood and growing occurrence of transferable illnesses, growing call for donated blood, rise in spending on fitness, technical developments in blood screening, growing alertness for fitness and increasing number of initiatives by many administrations and government associations are a few important issues motivating the development of the global blood screening market size. Yet, composite controlling outlines for sanction, shortage of expert manpower, existence of another know-how like digital immunoassay associated with high original investment expenditure and operative costs of testing are the limiting issues for the development of the global blood screening market size.
