

eSPACE Now Unlocks Doors

The Future of Integration is Here!

CHARLOTTE, NC, UNITED STATES, July 6, 2018 /EINPresswire.com/ -- That's right...you heard us. Not only is [eSPACE](#) the industry leading Facility Management Software...it is also the leader in Facility System Integrations.

Nearly 9 years ago we developed the first COOLSPACE integration with the Niagara Framework for HVAC Building Automation Systems. Since then, we have developed even more (see [HERE](#) for a more information on this).

Well...we have taken facility system integration to the next level...and that is to allow eSPACE or your Event Scheduler (remember eSPACE integrates with 14 other [Church Management Systems](#)) but to also unlock and lock doors. BOOM!!!!

No more late night trips back to the church to make sure the doors are locked. No more double entry of schedules in the event scheduler and your door system (or HVAC system).

Enter events one time and be DONE!

You can now create and approve your event in eSPACE (or one of our ChMS integration partners) and simultaneously communicate with your HVAC systems when to come on and off...AND...determine which door(s) you want unlocked/locked for that event. This is FREAKING AWESOME!

There are, however, some requirements from you...such as:

You need to have an access control system

That system needs to have an API that we can communicate with

See...that wasn't so bad.

Do we have your attention? If so, reach out and let us know how we can help you increase operational efficiency as well as what your facility uses. We are more than happy to investigate and make this a reality for YOUR team!

PS: Lighting and cameras are next on the integration train to efficiency!
