

Novara GeoSolutions Unveils New Geospatial Product in Oil & Gas Industry

StationNav allows users to quickly navigate to pipeline locations, which improves decision-making

NORWELL, MA, USA, July 2, 2018 /EINPresswire.com/ -- July 2, 2018. Norwell, MA – Novara GeoSolutions (Novara) (www.novarageo.com), the industry's leader in geospatial software and services for pipeline assets, announces the launch of a new product that is intuitive and easy to use. Users in the geospatial industry that need the ability to locate specific events and locations based on stationing values can use the [StationNav](#) widget, a plug-in for Esri's Web AppBuilder, to make the process simple and fast.

The StationNav widget allows you to locate and zoom the map window to a specific stationing value along a specified Route, allowing you to execute targeted searches and gather critical information quickly and accurately. By using StationNav, users can be better prepared for on-site inspections, can more efficiently navigate map data, and can identify data inconsistencies without having to leave the office. StationNav can be used across a wide variety of web applications, giving you flexibility to create web apps that give your users the right information at the right time.

Jake Opdahl, Director of Sales for Novara commented, "With a simple interface, you don't have to be a GIS Analyst to query the records and locations needed, from field tech to executives, StationNav provides a quick and effective tool for any user."

StationNav is one of many new widgets that Novara is launching. Those interested in learning more about StationNav can reach out to the Novara GeoSolutions team directly by emailing info@novarageo.com or register for their upcoming webinar, Web Widgets: Changing the Way We Map (<https://attendee.gotowebinar.com/register/5584777290466918401?source=Press+Release>) on Jul 25, 2018 at 1:00 PM EDT.
