GAOYAO, GUANGDONG PROVINCE, CHINA, July 4, 2018 /EINPresswire.com/ -- During the World Cup, iLanyards has been selling more of their sports lanyards. These have been bought by football fans as well as tourist guides who offer the lanyards to their tourist groups. As a leading Chinese lanyard manufacturer, iLanyards is happy to share some details about these sports lanyards.

All of the lanyards are produced at iLanyard's own factory. This is a state-of-the-art and well-managed space of 1500 square meters big. Thirty well-trained professionals work at this modern workshop.

The materials used for the lanyards are all eco-friendly. Dye sublimation process is used for coloring the lanyards. This gives the cords a softer finish, making the product more comfortable.

Regarding the eco-friendly and competitive lanyards, a spokesperson Jae from iLanyards commented, "We are especially proud of our ability to provide cost-effective yet green products. Our commitment to offering customers the best lanyards is paralleled only by our commitment to be considerate for our planet."

The finished product is a beautiful and practical lanyard. The lack of middlemen has always resulted in shorter delivery times. Lanyards are taken straight from the iLanyards factory to the customer, whether business or consumer. This streamlined and efficient delivery system has served the company well even in times of higher demand such as during the World Cup.

The spokesperson Jae added, "We don't let the quality of our product detract us from the quality of service. For the World Cup, we have been shipping more of our special sports lanyards. From large orders to smaller personalized ones, our product and delivery solution has measured up".
