The Colorado Mesothelioma Victims Center believes that many Navy Veterans had extreme exposure to asbestos while stationed or while visiting a shipyard. Unlike the shipyard workers who could leave work after eight hours, many US Navy Veterans were stuck on their ship and were literally breathing asbestos 24/7 for what could have been months. US Navy Veterans make up about one-third of people who will be diagnosed with mesothelioma in the

United States each year.

The group says, "We are urging a Navy Veteran with mesothelioma in Colorado to call us at 800-714-0303 before they retain the services of a lawyer. The fulltime mesothelioma lawyers we suggest get the best compensation results for Navy Veterans with mesothelioma. Please don't allow yourself to get shortchanged when it comes to mesothelioma compensation."

High-risk work groups for exposure to asbestos in Colorado include US Navy Veterans, power plant workers, oil refinery workers, miners, manufacturing workers, plumbers, electricians, auto mechanics, machinists, or construction workers. In most instances, these types of workers were exposed to asbestos in the 1950's, 1960's, 1970's, or 1980's.

The states indicated with the highest incidence of mesothelioma include Maine, Massachusetts, Connecticut, Maryland, New Jersey, Pennsylvania, Ohio, West Virginia, Virginia, Michigan, Illinois, Minnesota, Louisiana, Washington, and Oregon. However, mesothelioma does happen in Colorado.

However, based on the calls the Mesothelioma Victims Center receives a diagnosed victim of mesothelioma could live in any state including Colorado.
