

Aseptic Packaging Market Overview Till 2025 | Industry Size, Share and Forecast

The aseptic packaging market experiences growth due to rise in demand for the packaging solution from multiple sectors and the developing regions.

PUNE, MAHARASHTRA, INDIA, July 6, 2018 /EINPresswire.com/ -- The [aseptic packaging market](#) experiences growth due to rise in demand for the packaging solution from multiple sectors and the developing regions. Demand for convenience and packaged products is steadily on rise as the increase in urban population and demand from the food and beverage industry has spiked demand for aseptic packaging solutions.

The packaging primarily involves keeping food safe, fresh, and flavorful for at least six months without refrigeration or preservatives. It allows food to retain more color, texture, taste, and nutrition. The process destroys and microorganisms that would otherwise contaminate the food, help keep it fresh for longer periods of time.

The aseptic packaging market experiences growth due to rise in demand for the packaging solution from multiple sectors and the developing regions.”

Ashutosh Sable

Pre-filled syringes are expected to be the fastest growing market, which is expected to grow at a CAGR of 9.7% during the forecast period. The development of aseptic technologies in the pharmaceutical market has helped to improve the safety standards and logistical support. The sector is expected to contribute to the growth of aseptic packaging in the developing regions where the presence of pharmaceutical companies is expected to grow.

In terms of materials, the use of paper is estimated to achieve significant growth over the forecast period with an expected CAGR of 9.5%. The use of paper products is backed by concerns over ecological and sustainable packaging practices. Development in alternative sources of deriving paper products and enhancing their strength has resulted in increasing demand for the material. The use of plastics is widely being condemned by governments, which may result in a gradual decline in the use of plastic materials over the years.

developing countries of India, China, and Japan have large populations with rise in middle class and large scale urbanization. The demand for packaged food and beverage is on the rise as the consumer awareness towards food safety and packaging is expected to influence the growth. The increased presence of pharmaceutical companies in the region and their export commitment to other regions such as, Europe and North America has prompted them to adopt aseptic packaging to comply with regulations. The major companies in the aseptic packaging market include Amcor, Robert Bosch, Tetra Laval, Bemis, DuPont, Reynolds Group, Greatview Aseptic Packaging, and Schott AG.

About Us:-

Converged Markets is a premier provider of market intelligence and advisory services that delineates a focused vision to provide indispensable insights and strategic decision support to business leaders worldwide. Our team of knowledgeable and industry-experienced Business Consultants follows a distinct research approach and rigorous methodologies to analyze market dynamics that directly or indirectly impact mainstream businesses.
