The Ethereum Sweepstakes is not a company, it is a smart contract developed and deployed on the Ethereum blockchain. The principles are simple, to participate, a person sends one Ether to the Ethereum Sweepstakes smart contract and receives a SWEEP token, the ticket equivalent on the blockchain. Each SWEEP purchased is equal to a chance to win and redeemable in the future for one(1) ESPS profit sharing token. Upon the last SWEEP being sold, the smart contract sends a request to the blockchain to select a random winner and the winner of the Jackpot is selected and Ethers automatically transferred to the winner's wallet address used to purchase their SWEEP token.
