

# Lockdowel Invents Simple, Fast Chair Assembly -- See it at Lockdowel Booth 8073, IWF 2018 in Atlanta

*Lockdowel Slide-to-Lock Chair Assembly  
Requires No Screws, Cams or Glue -  
Assembled in a Minute*

FREMONT, CALIFORNIA, UNITED STATES, July 9, 2018 / EINPresswire.com/ -- [Lockdowel](#) Inc. announces their all new approach to simple, fast chair assembly - the Lockdowel [Slide-to-Lock Chair](#) fastener system. This is a unique Lockdowel product design incorporating standard Lockdowel EClips fasteners in a standard wood chair. No glue, tools, screws or cam locks are required to assemble the chair, and a chair designed using Lockdowel fasteners can be assembled in about one minute. The same chair utilizing conventional screws and bolts requires at least six minutes to assemble.

New Lockdowel Slide-to-Lock Chair Assembly shows that complex furniture designs can flat-pack easily.

The new chair will be available to view at Lockdowel Booth 8073 at the International Woodworking Fair (IWF) 2018, August 22-24 in Atlanta.

“This is an incredible breakthrough for our simple assembly fastening technology,” Lockdowel CEO Fred Koelling says. “Besides giving the industry a stronger, easy-to-assemble chair, it shows how Lockdowel fastening can be implemented into complex furniture designs.”

“

This is an incredible breakthrough for our simple assembly fastening technology! It shows how Lockdowel fastening can be implemented into complex furniture designs.”

*Fred Koelling, Lockdowel  
CEO and Co-founder*

According to industry experts, chairs make up 40% of the U.S. furniture market. Traditional chairs use 8-12 bolts, screws and glue that often come apart over time, but the Lockdowel chair uses slide-to-lock EClips fastening without bolts, screws or glue. “Chairs can now be shipped flat-pack for simple, fast assembly on site. And the chairs never come apart with vibration or wear,” Koelling says.

See how the new Lockdowel Slide-to Lock Chairs are assembled in these videos.
