

A New PDF Tool Create PDF in Batch without the Virtual Printer

A new freeware utility enables users to convert WORD and more formats to PDF format in bulk.

XI'AN, SHAANXI, CHINA, July 10, 2018 /EINPresswire.com/ -- Today PDFZilla, Inc. releases [Batch Word to PDF converter](#), a freeware conversion utility tool that allows conversion of Word to PDF format on the go. In addition to converting MS WORD files, the software supports a range of other formats including Excel (XLS, CSV, ODF, ODS), Rich text (RTF), PowerPoint (PPT, ODF, ODP, PPTX), Plain text (TXT) to PDF as well.

The tool comes equipped with an amazing feature called batch conversion. Unlike other PDF converting tools, users no more need the PDF virtual printer to convert files to PDF one by one.

Batch Word to PDF converter allows the conversion of more than one file easily. Users only need to select all the files that are to be converted and click on Start Now. This way, the tool will convert all the Word files into PDF in a batch.

Additionally, users can also choose to merge all the selected files in a single PDF as per their requirements. These two features make Batch Word to PDF converter stand out in the market.

How does it work?

The program comes with an easy to use wizard interface which guides users step by step. To get started, users need to drag and drop the Word file (or files) that require conversion in the tool interface. If more than one file is selected, users can merge the files into a single PDF document by checking the corresponding option at the bottom of the tool, however, this option is not mandatory. Next, select the location where the file is to be saved and click on Start Now.

Batch Word to PDF Converter comes equipped with special security features which allow users to set global PDF permissions in the output PDF file. Users can choose to prevent copying and printing and can even set a password to keep the freshly converted PDF files secure. This feature comes in handy when the PDF file contains confidential and copyrighted material which prevents anyone from reproducing the content.

The tool supports a range of languages including Arabic, Czech, Dutch, English, French, German, Greek, Portuguese, Korean and Simplified/Traditional Chinese.

Technology

Batch Word to PDF Converter is a freeware which not only keeps your data safe and secure but also ensures that the output PDF file is clean from any malware. The tool doesn't store any file anywhere, but simply converts on the go, thus ensuring utmost security.

Availability

The Batch Word to PDF Converter can be downloaded from http://www.pdfzilla.com/batch_word_to_pdf_converter.html

The software runs smoothly on a desktop and can also be run as a portable version from a USB drive. The tool supports all common Windows operation systems and can be downloaded as an EXE installer or ZIP version. Further, in order to convert the files to PDF, Adobe Acrobat reader and MS Office are not required.

Languages supported: Arabic, Czech, Dutch, English, French, German, Greek, Portuguese, Korean and Simplified/Traditional Chinese
