

Blasé to Beautiful; Arduous to Effortless: IntelliBoard Reporting & Analytics Now Here for Blackboard Learn & Canvas LMS

IntelliBoard, the premier reporting and analytics plugin for Learning Management Systems, now integrates with Blackboard Learn and Canvas.

MONROE, CT, USA, October 2, 2018
/EINPresswire.com/ -- IntelliBoard, the premier learning and analytics tool for learning management systems and

[Canvas](#) partner, has expanded services with [Blackboard Learn](#) and Canvas. Organizations currently using Blackboard Learn or Canvas will now have access to an expanded, configurable administrator dashboard that includes significant new features: LISA, an AI assisted natural-language search tool; configurable monitors that display reports and analytics based upon desired data; and multiple reports that capture critical LMS and eLearning data to help inform educational business decisions.

“

Our developers have spent months ensuring these integrations have the speed, efficiency, and quality of our other products and services.”

*Anatoliy Kochnev, CEO,
IntelliBoard*

Anatoliy Kochnev, IntelliBoard's CEO, expressed his excitement about IntelliBoard's expansion: "Our integration with Blackboard Learn and Canvas is incredible. Our developers have spent months ensuring these integrations have the speed, efficiency, and quality of our other products and services. We're thrilled to offer this to Blackboard Learn and Canvas clients, and we hope they are as happy to have the tool as we are to provide it. View

it for yourself - data is at your fingertips like never before."

Becky Keith, IntelliBoard's VP of Education echoed the enthusiasm, "These new integrations have been a long time coming. Multiple users of Blackboard Learn and Canvas have contacted us through the years and have remarked their disappointment at not being able to utilize IntelliBoard reporting and analytics. We look forward to spreading the word."

IntelliBoard users can query results using a "natural language" search string, e.g., "how many users enrolled this month," "show me failing students," or "users who did not complete." The LISA tool from IntelliBoard (Learning Intelligence Search Access) expands as users query - growing more responsive and intelligent as the number of unique queries and results grows.

The LISA tool is part of a broad list of new features for folks using IntelliBoard: expanded, configurable administrator dashboard; configurable monitors that display reports and analytics based upon your desired data; the Conditional Event Notifications Dashboards to create notifications on conditional events; the ability to build and configure dashboards based on specific permissions, and advanced aesthetics/easy-to-use, intuitive interface.

Using the IntelliBoard tools will bring educational decision makers closer to the metrics that

influence how learning is delivered, how learning happens, the tools that facilitate learning, and overall learner performance. Specific tools within IntelliBoard help to highlight high- and low-performing learners, tracking, compliance measurement, competencies, and engagement.
