

Cambridge Trading Academy Launches Their New Product - CTA Automated Trading Software

Cambridge Trading Academy Launches Their New Product - CTA Automated Trading Software on NQ Stock Market

LAS VEGAS, NV, UNITED STATES, July 23, 2018 /EINPresswire.com/ --

Cambridge Trading Academy has just announced the launch of their new fully automated trading software. The new software has been field tested for more than two and a half years and only runs when the user chooses. The software can trade nearly any asset across multiple markets. The Cambridge Trading Academy group uses it daily to trade the E-mini on the NQ Market

All that's necessary is to set a few simple-to-understand settings, turn on the automatic trading algorithm and let it run. That's it. Turn it on and let it go. Trades are taken automatically based on a proprietary method that uses a combination of analytics regarding price action, market momentum and the current market trend. Trades are then automatically exited based on parameters the user sets based on Cambridge Trading Academy's money management principles. Finally, the platform can create a multitude of reports based on the user's trading. For those thinking this is too good to be true, I welcome them to stop by the website and sign up for free training sessions and to test out how the software works for themselves," says

“

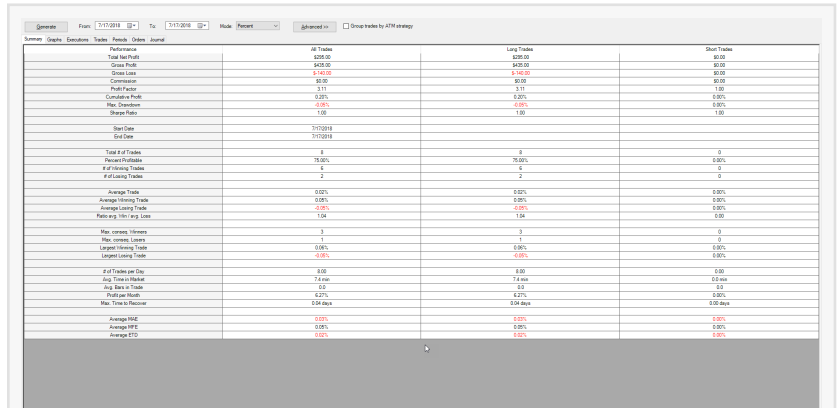

Break-free from J.O.B , and follow your passion ”

James Viscuglia II

James Viscuglia II, CEO of Cambridge Trading Academy and creator of the software. "My goal is for people to be able to make a living day trading. The software, along with our training sessions and day trading group help people who have very little knowledge about trading to learn and become successful."

Viscuglia believes in complete transparency. Because of this,

Cambridge Trading Academy is inviting those interested to take a look and see the software in action. They can watch the software and even talk to members of the day trading group who have been using the automated software to give them the freedom they've been seeking in life. For those who want to test out the software before considering making a purchase, they can sign up to one of the free
