

European Medical Journal presents: EMJ Hematology 6.1

Filled to the brim with a full congress review of EHA23, amazing hematology articles and a plethora of interviews, you won't want to miss this publication

LONDON, UNITED KINGDOM, August 2, 2018 /EINPresswire.com/ -- The European Medical Journal has published the latest edition of the [EMJ Hematology](#) eJournal, which includes a comprehensive review of this year's European Hematology Association (EHA) Congress, held in Stockholm, Sweden.

This year's eJournal presents key research, discussions, and future directions for the field of haematology. Highlights from the publication include an assortment of peer-reviewed articles on topics ranging from the use of allogeneic haematopoietic stem cell transplant and tyrosine kinase inhibitors as methods of treatment for chronic myeloid leukaemia to the latest clinical staging of mycosis fungoides and Sézary syndrome. In addition to personal insights from EMJ Hematology's Editorial Board, a selection of hand-picked abstracts taken from the landmark 23rd annual congress of the EHA have been summarised by the presenters.

With >11,500 attendees from around the globe making their way to Stockholm, Sweden, for EHA 2018, the programme of this year's event combined novel findings and new developments with current care protocols to improve patient care; more programme highlights can be found as part of the extensive Congress Review detailed within our eJournal.

“

EMJ Hematology 6.1 is sure to showcase fascinating content that will spark countless hours of intense debate and discussion, no doubt leading to further developments and breakthroughs...”

Mr. Spencer Gore

[EMJ Hematology 6.1](#) is sure to showcase fascinating content that will spark countless hours of intense debate and discussion, no doubt leading to further developments and breakthroughs for the haematology discipline.

Notes to Editors
About EMJ

Renowned for being the only medical journal to review the biggest European congresses, six weeks after each event is held, the European Medical Journal, is an independent, open-access

eJournal dedicated to delivering first-class insights into ground-breaking changes, and advancements in the field.

The logo for EMJ European Medical Journal. It features the letters 'EMJ' in a large, bold, red serif font. To the right of 'EMJ', the word 'EUROPEAN' is written in a smaller, black, sans-serif font. Below 'EUROPEAN', the words 'MEDICAL JOURNAL' are written in the same black, sans-serif font. A thin red horizontal line is positioned between 'EUROPEAN' and 'MEDICAL JOURNAL', ending in a small red dot on the right side.

Spanning sixteen therapeutic areas, including Innovations, Cardiology, Oncology, and more, each journal provides the reader with the latest from the field within our medical congress highlights, abstract reviews, and peer-reviewed articles to name but a few of its wide content selection. Flagship EMJ journals are also published quarterly, bringing an assortment of research and review papers from a variety of topics, alongside unique features and interviews. If you're interested in receiving quarterly newsletters, and the latest publications straight to your inbox, please do subscribe for free: <https://www.emjreviews.com/mailling-list/>.
