instance: state government in Hyderabad, India in November 2017, announced for setting up of infertility treatment centers in government hospitals. The first target of the initiative was Gandhi Hospital and thereafter the infertility treatment centers started other hospitals too. Furthermore, a groundbreaking fertility initiative in Japan was launched under which the public money would be used to pay for women for freezing eggs for use later in their life. Under a three-year pilot scheme at Juntendo University Urayasu hospital in July 2016. State funds are to be used in Japan and possibly the world for covering 80% of the freezing eggs cost for local women of age 25 to 34, who have the option of using them until they reach 45.”

The global fertility drug market is geographically divided among four major regions – North America, APAC, Europe, and Rest of the world. Europe is expected to be leading region in global fertility drug market. The European market is driven by high prevalence rate of infertility in the UK, Germany, France and other European countries. Asia Pacific market is expected to have the highest CAGR amongst all the regions for the forecast period of 2018-2023. The improvement in economy and healthcare facility is expected to boost the market in Asian countries in the forecast period.
