Forecast to 2023" new reports to its research database. The report spread across 150 pages with tables and figures in it.

Pipelines associated with the oil and gas business are utilized to transport a multitude of commodities such as crude oil, natural gas, and refined products over various distances. Onshore pipelines are constructed over land and may even stretch across different countries. Onshore pipelines may either be laid underground or above ground. Crude oil and natural gas are found in rock formations in the earth's crust. The depths at which oil and gas reservoirs occur can vary from a few meters to more than 40,000 feet. The valuable petroleum resources are extracted by drilling through the surface to the depths where the resources occur.
