

Tarps Now Announces Expanded Lines of Welding Curtains, Welding Screens, Welding Blankets and Tarps for Heavy Industry

Company Expands Operations with New Lines of Welding Curtains, Screens, Blankets and Flame-Resistant Tarp Fabrics

ST. JOSEPH, MICHIGAN, UNITED STATES, August 8, 2018 /EINPresswire.com/ -- Tarps Now® is pleased to announce the expansion of its proprietary lines of flame resistant [Welding Curtains](#), [Welding Blankets](#) and Fire-Retardant Tarps that are engineered to improve the workplace safety where welding and industrial heat processes take place and pose an ongoing risk to worker safety. These new lines of Industrial Grade [Welding Screens](#), Welding Curtains and Welding Blankets are engineered to significantly reduce the hazards associated with welding and related industrial processes involving sparks, UV flashes, spatter, and heated dust from manufacturing processes.

In addition to these new lines of welding fabrics, Tarps Now® also announced the release of a wide variety of PVC welding curtains that includes fire resistant, transparent vinyl. While light duty welding blankets typically used for general welding provide protection against light sparks and spatter, these can also be used vertically. The company specializes in the production of stock and custom Flame Resistant fabrics and related materials.
