

Global BDO Market Research and Forecast 2018-2023

Global BDO Market, Size, Share, Market Intelligence, Company Profiles, Market Trends, Strategy, Analysis, Forecast 2018-2023

INDORE, INDIA, August 17, 2018 /EINPresswire.com/ -- Orion Market Research (OMR) recently published a market research report on global 1,4 butanediol market. The market is estimated to show a significant growth due to increasing consumption of tetrahydrofuran and polybutylene terephthalate during the forecast period. The global BDO market is segmented mainly into three major segments includes technology, application and end users. The report provides detailed and insightful chapters which include market overview, key findings, strategic recommendations, market estimations, market determinants, key company analysis, market insights, [company profiling](#), market segmentation, geographical analysis, and analyst insights of the market.

Full report of global Butanediol Market is available at: <https://www.omrglobal.com/industry-reports/1-4-butanediol-market/>

“

End-user industries will provide an upsurge to the BDO market”

OMR Analyst

The end user industry is one of the major factors augmenting the BDO industry globally. Biological pathways of BDO production is providing greater hope to the chemical industries in the present time. Many key players are showing major interest towards bio-based products. The application areas of the BDO is increasing at a rapid

pace. The BDO is one of the important raw materials used for basic organic chemicals and fine chemicals. The principal products developed from BDO include tetrahydrofuran and gamma-butyrolactone, having solvents applications and high-value derivatives. Tetrahydrofuran is used for the production of spandex fibers; and other resins, solvents, and printing inks for [plastics](#). The properties of PBT such as thermal stability, durability, and high strength make it suitable to be used in electrical appliances. PBT combines mechanical and electrical properties and has robust chemical resistance. It is an industrial chemical providing good environmental characteristics and minimize health risks for workers. It is used in a broad range of industries including medicine industry; textile industry; chemical industry; papermaking industry; daily-

using chemical industry; and automobile industry.

Rising demand for Polybutylene terephthalate is another major factor in rising market of BDO. PBT is used as an insulator in electrical and electronics industries as it is a thermoplastic polymer. The PBT is extensively used in broad range of application and is commonly used in electrical, electronic, and automotive components. PBT resins and PBT compound are the two derivatives of PBT. PBT resin just includes base resin whereas PBT compounds consist of several materials including glass filing, and additives. The material is used often in mineral or glass filled grades. When the product is made as fire resistance, some additives are added to improve its UV and flammability properties. Additionally, it is used for making electrical parts, electronic parts, and auto parts. Application of PBT compound includes motor cover, motor brushes, and TV set accessories and so on. The compounds made from BDO are designed to enhance the long-term reliability. In Asian countries, PBT is a demanding material in the electrical and electronic industry, hence a significant market can be expected in the near future.

The report covers:

Comprehensive research methodology of Global 1,4 Butanediol Market.

This report also includes detailed and extensive market overview with Analyst insights & key market trends.

Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the Global 1,4 Butanediol Market.

Insights about market determinants which are stimulating the Global 1,4 Butanediol Market.

Detailed and extensive market segments with regional distribution of forecasted revenues.

Extensive profiles and recent developments of market players.

About Orion Market Research

OMR is a market research company known for its qualitative and quantitative research reports. The company aims to provide business insights for decision making to the global clients. OMR provides syndicated and [customized research reports](#), company profiling, consulting and other research-based services to global clients. The "Orion" in the name signifies rising up in the sky, the company is committed to provide valuable insights that will help its clients to rise and shine. OMR provide customer-centric reports which facilitate the subscribers to know their touch points which can be capitalized for their revenue growth and to gain a competitive edge.
