

IBGX cryptocurrency exchange ready for surge in popularity in Altcoins.

DUBAI, UAE, September 7, 2018

/EINPresswire.com/ -- Altcoins (short for 'alternative' coins) have seen a surge of popularity. In 2017, altcoins like Ethereum, Litecoin and Ripple rode the coattails of Bitcoin and joined the conversation around cryptocurrency. Ethereum had a huge 2017, with its value growing 10,000% to over \$1000 per coin. Accordingly, Ethereum is the most popular altcoin in the beginning of 2018.

In 2018, we have seen the flood of Altcoins hit the cryptocurrency market in an attempt to displace Bitcoin at the top. Ethereum, Litecoin, and Ripple are currently leading the way in terms of media coverage, but the race has only just begun. Most of the media landscape covering cryptocurrency have yet to peel the onion back much further than looking at Bitcoin specifically, but it seems inevitable that this will change in soon.

Hailing from Indonesia is a new cryptocurrency exchange, IBGX. IBGX prides itself to be a world-class cryptocurrency exchange, designed to bridge the gap between traditional online trading and Crypto investments. It will also include a financial management function with a seamless process where buying, storing, exchanging and trading on both fiat and cryptos is available. In short, investors can manage all their fiat and crypto finances with ease and peace of mind.

Along with the exchange platform, IBGX will also be releasing a token program to attract investors into the fold. Judging from their future roadmap, it seems all plans are put in place for IBGX to become the next big cryptocurrency exchange on everybody's lips. With that, a new platform for all cryptocurrency investors to trade their investments in.
