

# CNC Factory Owner Addresses Cabinet Makers Association Breakfast One Day Before IWF Atlanta

*Chris Corrales CNC Factory Owner  
Addresses Cabinet Makers Association  
before IWF Atlanta about 3rd Generation  
Tech and Made in USA Benefits - IWF Bldg  
C #2722*

ATLANTA, GEORGIA, UNITED STATES, August 13, 2018 /EINPresswire.com/ -- Chris Corrales, the owner of [CNC Factory](http://CNCFactory.com) (CNCFactory.com) in Santa Ana, California, will speak to the Cabinet Makers Association, August 21 at their [IWF Atlanta Breakfast](https://www.cabinetmakers.org/august-2018-atlanta.html), one day prior to the IWF show. Corrales will cover what is new in CNC (Computer Numerically Controlled) equipment for woodworking and what is newly improved. The breakfast will be held at the Embassy Suites by Hilton Centennial Olympic Park at 7:30am. <https://www.cabinetmakers.org/august-2018-atlanta.html>

Chris Corrales and JC Bailey discuss the benefits of CNC Factory's third generation technology and the "Made in the USA" difference.

Corrales will discuss:

1) 3rd Generation CNC Robotics;

“

Because CNC Factory manufactures equipment in the United States, we can incorporate industry advances quickly, expertly and affordably. And we have with the Scorpion Lockdowel LDR machine.”

*Chris Corrales, CNC Factory Owner*

2) The new CNC Factory Printing and Marking Block - allows each cut piece to be labeled with post production instructions; and

3) The new [Lockdowel](#) Scorpion boring and insertion machine - enables flat-pack shipping and cabinet assembly without using screws or glue.

“Because CNC Factory manufactures equipment in the United States, we can incorporate industry advances quickly, expertly and affordably. Just like we have with the Scorpion Lockdowel LDR machine,” Corrales says. “Our LDR machine is equipped with third generation, technology, production controls, real-time virtual support, automated

gun cleaning, precise laser measuring - and it's designed for one operator, even when working with large productions.”

According to the company, CNC Factory will have five different CNC machines on display at IWF:

--Python Router with loading and unloading - \$69,000

--Viper Router - \$32,900

--Badger 3600AT Edgebander - \$16,900

--Cyclone 4896 Thermofoil Press - \$23,900

--Scorpion Lockdowel Drilling and Insertter - \$69,900

"We will have the newest in CNC equipment at IWF Building C booth 2722. Everyone is invited to come see our live demos throughout the show," Corrales says.

### About CNC Factory

Chris Corrales has more than 20 years of cabinet making expertise. His real-world experience inspired him to start building better CNC machines 13 years ago, with a clear goal of helping companies embrace CNC automation. His mission: To make CNC automation as common place as a table saw.

Today this vision is core as CNC Factory designs and manufactures high quality precision CNC routers, machining centers, edgebanders, Lockdowel insertion machines and thermofoil 3D presses to meet the urgent business needs of customers.

At CNC Factory, providing the fastest, most accurate and dependable CNC Machines and supporting products is only the beginning of meeting customers' needs. "We never leave them all by themselves," Corrales promises.

Power up your needs with CNC Factory and capture more opportunities within your market! CNC Factory 2001 South Grand Ave., Santa Ana, CA 92705 714-581-5999, [CNCFactory.com](http://CNCFactory.com)
