

Alpha Imaging releases the Intelli-C

The Intelli-C offers true multipurpose imaging designed specifically to accommodate the constraints of a value-based healthcare environment.

WILLOUGHBY, OHIO, UNITED STATES, August 27, 2018 /EINPresswire.com/ -- Alpha Imaging, is proud to announce the release of the Intelli-C, a multipurpose tilting C fluoroscopic imaging system.

Alpha Imaging has launched the new imaging device called the Intelli-C for nationwide distribution. The Intelli-C offers true multipurpose imaging designed specifically to accommodate the constraints of a value-based healthcare environment. The Intelli-C maximizes utilization, optimizes image quality while reducing dose and improving patient care.

Perrico states, "we are grateful to our manufacturing partners at NRT in Aarhus, Denmark, who worked tirelessly with our team to design, refine and ultimately deliver this product."

The Intelli-C is a multipurpose tilt-C X-ray system, capable of performing a wide range of procedures ranging from radiographic, serial, and fluoroscopic X-ray, to specialized applications, such as angiographic studies, GI procedures and pain management. The Intelli-C system also has the ability to perform Peripheral DSA exams with a robust imaging system and software that features a 17"x17" CsI Flat Panel Detector, designed to provide excellent image quality at low radiation doses.

“

The versatility of the Intelli-C ensures this system will not sit idle in virtually any size radiology department."

Michael Perrico, CEO of Alpha Imaging

"It's a game changer," says Mark Rackliffe, Vice President of Channel Sales, who will lead the sales efforts for Alpha Imaging across the U.S. "Hospitals have very few options for this type of product. The Intelli-C provides low-dose, high quality images for a vast array of imaging exams. It also requires a much smaller footprint than would be expected, keeping siting costs to a minimum." Rackliffe

continues, "judging by the amount of interest we have seen from initial sales efforts, the market has been waiting for the Intelli-C."

About Alpha Imaging

Alpha Imaging, headquartered in Willoughby, Ohio, was established in 1986 and has spent 10 consecutive years on the Inc. 5000 list of fastest growing small businesses in America. Today, Alpha Imaging is one of the country's largest independent distributors of medical imaging equipment and related products and services. Alpha is the exclusive distributor for several major manufacturers of medical imaging equipment. Our product portfolio consists of: low-dose CT scanners, cardiovascular and vascular imaging labs, PACS, digital radiographic and fluoroscopic systems, and a comprehensive women's healthcare portfolio. Our mission is to provide a combination of innovative imaging solutions with superior customer service to continue the growth of our business and enhance our client relationships as we contribute to the betterment of the health and wellness of the population in our served market.
