PUNE, INDIA, August 16, 2018 /EINPresswire.com/ -- MarketResearchNest.com adds "Global [Digital Isolators Market](#) 2018 by Manufacturers, Regions,

Type and Application, Forecast to 2023" new reports to its research database. The report spread across 133 pages with tables and figures in it.

A digital isolator is used to get a digital signal across a galvanic isolation boundary. They serve a similar purpose to optocouplers, except optocouplers are far too slow and error prone for high speed (1MHz+) digital signals. They also use a different coupling technology, usually transformer or RF link as opposed to an optical link.

This report focuses on the Digital Isolators in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The worldwide market for Digital Isolators is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
