

Global Holographic Imaging Market Research and Forecast 2018-2023

Global Holographic Imaging in Healthcare market, Size, Share, Market Intelligence, Company Profiles, Market Trends, Strategy, Analysis, and Forecast 2018-2023

INDORE, INDIA, August 27, 2018 /EINPresswire.com/ -- According to OMR analysis, the global holographic imaging market is expected to grow at a significant rate during the forecast period (2018-2023). The global holographic imaging market has witnessed a significant growth due to increasing prevalence of CVDs. The global holographic imaging market is segmented on the basis product type, application, end users, and geography. The report provides detailed and insightful chapters on market overview, key findings, strategic recommendations, market estimations, market determinants, key company analysis, market insights, company profiling, market segmentation, geographical analysis and analyst insights.

Full report of global holographic imaging market is available at:

Rising prevalence of cvds are the major driver for the growth of holographic imaging market"

OMR Analyst

https://www.omrglobal.com/industry-reports/holographicimaging-market/

"The global holographic imaging market on the basis of application is bifurcated into medical imaging, medical education and biomedical research. The holographic imaging technology has increasingly been used in medical imaging by the surgeons, physicians, and doctors. This technique is used in a broad range of medical applications

such as X-Ray holography; <u>endoscopic</u> holography; internal hologram recording endoscope; external hologram recording endoscope; holography in ophthalmology; holography in dentistry; holography in otology; and others. Multiplexed holography is a technique that has been widely used for displaying 3D tomographic medical data. The hologram of the objects is made by using photographically scaled images of that object. This technique enables producing a holographic image of size different than that of original size.

The market on the basis of geography is divided among four major regions – North America,

APAC, Europe, and Rest of the world. North America is the leading market. North American market is driven by high adoption of the technology in research laboratories and academic centers in the region. Asia Pacific market is expected to have the highest CAGR amongst all regions during the forecast period of 2018-2023. APAC market is driven by the increasing prevalence of CVD and rising disposable income within the region."

The report covers:

Comprehensive research methodology of Global Holographic Imaging Market. This report also includes detailed and extensive market overview with Analyst insights & key market trends.

Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the Global Holographic Imaging Market.

Detailed and extensive market segments with regional distribution of forecasted revenues. Extensive profiles and recent developments of market players.

Orion Market Research (OMR) is an Indian research company known for its crisp and concise reports. The company is equipped with an experienced team and young brigade of analysts. The company provides quality syndicated research reports, <u>customized research reports</u>, Company profiling, consulting and other research-based services. OMR provide global and regional market reports of various domains such as healthcare, energy, IT, chemicals, and automobiles. OMR provide a 360-degree view of the market with parametric analysis, key market insights, key findings, statistical forecasts, competitive landscape, extensive segmentation, key trends, strategic recommendations and detailed company profiles.
