HFX counts one million clockings for EveryOneCloud in first year

Rapid increased use of cloud workforce management solutions as companies look to support operations and growth

CODICOTE, HERTS, UK, August 21, 2018 /EINPresswire.com/ -- HFX has announced that its EveryOneCloud solution has seen fast adoption by customers since being launched in August 2017. HFX's EveryOneCloud solution enables organisations to track staff attendance, presence and location. It supports mobile, web, telephony and QR codes for capturing information. Since being launched EveryOneCloud has recorded over one million clockings and HFX forecasts an increase to over five million by its second anniversary.

EveryOneCloud workforce management solution supports over one hundred devices including biometric hand readers, face recognition, finger print as well as traditional card/proximity based devices.

> EveryoneCloud is incredibly flexible and we see it being deployed in many market segments to capture attendance, including for Lone Workers, Students and field staff"
>
> *Nick Whiteley, CEO, HFX*

Nicola Smart, COO, HFX and Autotime said; "The benefit of HFX's cloud solution is its simplicity and flexibility, which has enabled us to extend our portfolio. We have already expanded our footprint outside the UK with our first customer in South Africa, ahead of our planned growth for the end of 2019."

Nick Whiteley, CEO at HFX said: "This has been a stellar year for our EveryOneCloud solution - we have seen an amazing demand with uptake of an average of six new customers a month. This has accelerated in the last quarter and we expect to see this to continue into year two."

He continued; "EveryoneCloud is incredibly flexible and we see it being deployed in many market segments to capture attendance, including for Lone Workers, Student Attendance and field staff as well as in the traditional sectors in which we operate."

As well as recording attendance, EveryOneCloud provides a multi-dimensional data collection capability that enables organisations to record in real-time, staff location, activity, client or contract or any other attribute the client wishes to monitor and report on.

Oliver Page, Account Manager at Workforce Staffing, an award-winning recruitment and staffing

agency commented: "EveryOneCloud is a real game-changer for the recruitment industry. The system empowers agencies to deliver a fully transparent and accountable service, combining powerful and easy to use features such as real-time attendance verification, absence alerts, remote enrolment and automatic roll-call, with the convenience of being fully cloud-based so it can be deployed quickly and accessed anytime, anywhere."

Workforce Staffing has adopted EveryOneCloud to deliver total transparency of its supplied temporary workforce to the Worcester site of metal cast manufacturer JVM Casings, adding significant value to its managed service. Use of EveryOneCloud has enabled Workforce to assume full responsibility for the attendance of its supplied staff, assisting managers to proactively maintain staffing levels (and therefore maintain productivity on assembly lines), track KPI metrics and streamline its payroll and invoice process.

For a full case study on how Workforce Staffing and JVM Casings are benefiting from EveryOneCloud please email: andreina@pra-ltd.co.uk
