

# Process Pigging Specialist HPS Appoints Agent for Brazil

*Zeta Controles LTDA will represent HPS Product Recovery Solutions throughout the country.*

NOTTINGHAM, UK, August 22, 2018 /EINPresswire.com/ -- [HPS Product Recovery Solutions](#), specialists in liquid product recovery ('[pigging](#)') systems for process industries, have appointed [Zeta Controles Ltda](#) as their official representatives in Brazil.

Based in Mogi das Cruzes, Sao Paulo, Zeta Controles Ltda will work in partnership with HPS to deliver pigging and liquid transfer projects to companies throughout the country.

Zeta Controles Ltda is now also the official Brazilian supplier for HPS spare parts and accessories.

## Strong Partnership

While HPS already has some customers in Brazil, it's looking forward to working with Zeta Controles to bring pigging technology to an even wider audience within the country.

Gilbert Murphy, HPS founder and CEO said, "Brazil is a large and diverse market with many companies manufacturing or processing liquids. We see a lot of potential for our solutions to help many Brazilian organisations improve their efficiency and productivity."

“

Pigging has a lot of benefits, from reducing waste and increasing yields to speeding up changeovers and reducing cross-contamination risks"

*Eduardo Tiago*

"The team at Zeta Controles have an in-depth understanding of the Brazilian market as well as outstanding technical knowledge and a lot of experience. We're proud to have them represent us".

Eduardo Tiago, Director at Zeta Controles stated

"The use of pigging technology in the processing industries

is increasing throughout the world, and Brazil is no exception. Pigging has a lot of benefits, from reducing waste and increasing yields to speeding up changeovers and reducing cross-contamination risks".

HPS Process Pigging Specialist

Zeta Controles Ltda

"HPS are the leaders in this exciting technology and we're looking forward to helping Brazilian companies use it to improve their productivity, efficiency and effectiveness".

### What is 'Pigging'?

Pigging uses a special projectile (a 'pig') to remove residual liquids from pipelines. It's used in a wide range of manufacturing processes and with a large selection of products. These are as diverse as foods such as ready meals, sauces, confectionery and chocolates, along with beverages such as wine, juices, spirits and soft drinks, to paints, coatings, pet food, glues, toothpastes, deodorants, and other personal care and household goods.

In fact, just about any product or ingredient that's pumped during manufacture, can be 'pigged'.

### Improved Efficiency, Productivity and Profits

By using pigging systems, companies can continue to process, package or sell product instead of wasting it.

Pigging increases yields and capacity, makes product changeovers faster, reduces waste handling costs and improves operational efficiency. So, pigging systems give a high return on investment - increasing profits and delivering a quick payback. And because there's much less product waste, along with savings in water and cleaning chemicals, pigging is seen as 'green' technology and good for the environment.

Murphy concludes, "HPS and Zeta Controles have a strong partnership. Working closely together we're really looking forward to bringing the benefits of our liquid product recovery technology to a wide range of Brazilian businesses".

### About HPS Product Recovery Solutions

Founded in 1995, HPS Product Recovery Solutions increases its customers profitability by maximizing product yields, reducing waste, helping environmental sustainability and improving efficiency. This is through product-recovery (pigging) systems, liquid distribution and transfer solutions for processing industries.

Headquartered in Nottingham, UK, HPS has offices in the US and Australia, and global partners worldwide, including Brazil, China, Malaysia and Thailand.
