

Blockchain(B-C) Authority Based on B-C Standards and Principles.

We need to create a blockchain world! We even have to expand B-C onto new frontiers in every field from technology to peace, health, happiness, and prosperity.

WASHINGTON, DC, USA, August 23, 2018 /EINPresswire.com/ -- The time for blockchaining the world and every bit of relevant data is at hand. We must create 'blockchain' standards for all individual, group and country life. We need to B-C/digitize all human behavior.

Know and Harness the Difference Between Your Brain and Mind.

“

So far the blockchain's recognized potential is just the tip of the iceberg! We must B-C every human behavior from life to research and everything else in between.”

Sajid Khan

Blockchain(B-C) your life. From 'blockchaining' individual lives to groups and countries. We need to create open Blockchain standards. Even create Blockchain Awards. Apply B-C techniques to research everything from human behavior, relationships, curing diseases, unlocking the mysteries of philosophy, peace to self-improvement.

We must B-C every individual, even every company, group, and country by assigning a B-C value.

We must redefine definitions of all human values by injecting B-C standards. Beauty contests like Miss Universe must take into account not just looks but also all human

values. In the future, we will hold a Miss B-C contest.

We even need a B-C system of justice.

Expressions like, 'Please B-C your life' should become common and 'actualize-able'.

We need to create a blockchain world and it can and will be done!

Please let's start with digitizing all human behavior:

It is amazing that in spite of all this progress in the mind sciences the ...

We must even create a B-C currency that has shares that belong to every human being on earth:

It is Clear From the Success of Bitcoin That the Time Has Come to ...

We even have to expand B-C onto new frontiers in every field from technology to peace, health, happiness, and prosperity.

If any of the above ideas have already been proposed then these individuals are my partners on blockchaining the world.
