

Stents Market is expected to reach \$14, 838.24 million by 2023, with a CAGR of 5.6 %

Hospitals have a major share in the Stents Market, where cardiac centers have a faster growth rate with a CAGR of 6.4% during 2018-2023

HYDERABAD, TELANGANA, INDIA, August 24, 2018 /EINPresswire.com/ -- According to new market research report by IndustryARC titled "[Stents Market: By Product \(Coronary, Peripheral, Stent-Related Implants\); By Material \(Metallic, Polymeric, Natural\) & By Region \(Europe, Asia-Pacific, North America, RoW\)-Forecast \(2018-2023\)](#)", the market is expected to reach \$14, 838.24 million by 2023, with a CAGR of 5.6 %. Increasing population of coronary or peripheral artery diseases due to intake of more cholesterol and smoking, drives the market.

North America dominates the Stents Market during the 2018-2023 forecast period

North America has a major share in the Stents Market. This can be attributed to the availability of reimbursement facilities, increasing prevalence of diseases, and presence of large number of companies that promote the products. Growth of geriatric population and sedentary lifestyle are other factors boosting the market. Development of innovative products is the main factor contributing to the growth of vena cava filters.

The Asia Pacific region is driven by changing lifestyles, increasing geriatric population, and growth of medical tourism. Countries like China and India have favorable government initiatives that help with the pricing of medical devices. This factor is slated to spur the growth of the synthetic grafts in the region in the coming years. The growth of per capita healthcare expenditure in Asia Pacific is also expected to spur the growth for renal stents.

Selected Regulatory Analysis done in the full Report:

Hospitals have a major share in the Stents Market, where cardiac centers have a faster growth rate with a CAGR of 6.4% during 2018-2023. Most of the stent procedures are conducted in hospitals only. Growth of aging population, middle class and growing chronic diseases like coronary heart disease, obesity, and diabetes are the main factors driving the growth of stents. Doctors implement angioplasty when a person suffers a cardiac arrest. However, it may not always be available in all hospitals. This factor shows the need for the femoral- popliteal stent in hospitals.

The use of the carotid stents in angioplasty has increased due to improvements in stent design and anti-platelet treatments. Growing aging population with cardiovascular diseases increases the number of stent procedures performed in the cardiac centers.

Selected Driving Factors Mentioned in the Full Report:

Growing consumption of cholesterol rich food and smoking habits have increased in the last decade. The changing lifestyle has led to changing eating habits, which is leading to an increased demand for iliac stent in the near future.

Governments of developing economies are framing policies to lower the prices of metal stents so that the devices are available for more number of patients suffering from cardiovascular diseases.

Growing medical expenditures due to rising disposable income of the middle class population and growing awareness about stenting will bolster the Stents Market during the forecast period.

PCI or Percutaneous Coronary Intervention is performed in a shorter interval of time compared to a by-pass surgery, as the stent is inserted into the body from the groin or arm through a catheter. Due to less recovery time, the adoption of stents will rise in the future.

B. Bioabsorbable Stents Market

<https://industryarc.com/Report/15944/bioabsorbable-stents-market.html>

Stents Market is segmented as below:

The stent artery procedure has been used in the treatment of obstructive coronary artery disease since the introduction of balloon angioplasty. Different types of drug eluting stents specific to the application drives the growth of the market.

The market is segmented as below:

Stents Market by product

1. Coronary
2. Peripheral
3. Stent related implants

Stents Market by material

1. Metallic
2. Polymeric
3. Natural

Stents Market by geography(14+ countries)

Stents Market by entropy

What can you expect from the report?

The Stents Market Report is prepared with the Main Agenda to cover the following 20 points:

1. Market Size by Product Categories
2. Market trends
3. Manufacturer Landscape
4. Distributor Landscape
5. Pricing Analysis
6. Top 10 End user Analysis
7. Product Benchmarking
8. Product Developments
9. Mergers & Acquisition Analysis
10. Patent Analysis
11. Demand Analysis (By Revenue & Volume)
12. Country level Analysis (15+)
13. Competitor Analysis
14. Market Shares Analysis
15. Value Chain Analysis
16. Supply Chain Analysis
17. Strategic Analysis
18. Current & Future Market Landscape Analysis
19. Opportunity Analysis
20. Revenue and Volume Analysis

Q. Does IndustryARC publish country, geography or application based reports in Stents Market?

Response: Yes, we do have separate reports and database as mentioned below:

1. Europe Stents Market (2018-2023)
2. Asia Pacific Stents Market (2018-2023)
3. North America Stents Market (2018-2023)
4. Coronary Stents Market (2018-2023)
5. Peripheral Stent Market (2018-2023)

Q. Does IndustryARC provide customized reports and charge additionally for limited customization?

Response: Yes, we can customize the report by extracting data from our database of reports and annual subscription databases. We can provide the following free customization:

1. Increase the level of data in application or end user industry.
2. Increase the number of countries in geography or product chapter.
3. Find out market shares for other smaller companies or companies which are of interest to you
4. Company profiles can be requested based on your interest.
5. Patent analysis, pricing, product analysis, product benchmarking, value and supply chain analysis can be requested for a country or end use segment.

Any other custom requirements can be discussed with our team, drop an e-mail to sales@industryarc.com to discuss more about our consulting services.
