

Monetizr and Plymouth.AI announce strategic partnership

DALLAS, TX / ATLANTA, GA, USA, August 28, 2018 /EINPresswire.com/ -- Today [Plymouth.AI](#) and [Monetizr](#) announced strategic partnership. Plymouth.AI is research firm focused on the intersection of Artificial Intelligence with technologies on the frontier of innovation and development. Monetizr is the world's first blockchain gaming reward engine that rewards gamers, increasing engagement for developers and enabling brand sponsored rewards.

This collaboration will bring mass adaption to blockchain technology, eSports and gaming. As Dallas's suburb Frisco, Texas is a sports town with rapidly developing eSports and gaming scenes it is crucial to create the infrastructure that enables teams to organize eSports and gaming tournaments, rewards participants and fans for their engagement and support, and ensures that all winnings are secure. Partnership between Plymouth.AI and Monetizr will also bring considerable real-life rewards for participants and fans, like the possibility to earn exclusive teams merchandise or win tickets to games after participating in related mobile games and team events.

One of the great things about blockchain technology is the transparency and security it brings. Often people are hesitant to participate in gaming events involving money, fearing that their winnings might be compromised by system error or some form of scamming. Blockchain technology makes the whole process transparent and the winnings are easy to track.

Monetizr and Plymouth.AI are excited to start collaboration and bring first results in making Frisco's eSports and gaming scenes safer and more rewarding for fans.

Cijoy Olickal CEO of Plymouth.AI shared that he is excited about this partnership because it will bring collaboration and mass adoption to Blockchain technology, eSports and gaming to his home city of Frisco (TX).

This summer Monetizr is participating in [500 Summer School for Blockchain](#) and has reached a considerable milestone of 10 million monthly active gamers in their ecosystem.
