

Global Neurosyphilis Market (Asymptomatic, Meningeal, Meningovascular, General Paresis, Tabes Dorsalis) Forecast to 2025

MarketResearchNest.com adds "Global Neurosyphilis Market Size, Status and Forecast 2018-2025" new reports to its research database.

PUNE, INDIA, August 30, 2018 /EINPresswire.com/ -- MarketResearchNest.com adds "Global [Neurosyphilis Market Size](#), Status and Forecast 2018-2025" new reports to its research database. The report spread across 91 pages with tables and figures in it.

This report focuses on the global Neurosyphilis status, future forecast, growth opportunity, key market and key players. The study objectives are to present the Neurosyphilis development in United States, Europe and China.

Neurosyphilis is an infection of the brain or spinal cord caused by the spirochete *Treponema pallidum*. It usually occurs in people who have had chronic, untreated syphilis, usually about 10 to 20 years after first infection and develops in about 25%-40% of those who are not treated. The United States' Centers for Disease Control and Prevention (CDC) advises that neurosyphilis can occur at any stage of a syphilis infection.

Neurosyphilis has four different forms: asymptomatic, meningovascular, tabes dorsalis, and general paresis. In rare instances, active neurosyphilis can mimic Alzheimer's disease. In addition to evaluation of any symptoms and signs, various blood tests can be done. Additional tests to look for problems with the nervous system may include Cerebral angiogram, Head CT scan, Lumbar puncture and MRI scan of the brain, brainstem, or spinal cord.

In 2017, the global Neurosyphilis market size was xx million US\$ and it is expected to reach xx million US\$ by the end of 2025, with a CAGR of xx% during 2018-2025.

The key players covered in this study

Abbott
Bayer
Eli Lilly and Company
