

Washington Construction Defect Center Now Urges a Homeowner in a Newly Built Subdivision in Washington State to Call Anytime Them If Their Punch List Repairs for The Builder Never Got Done

WASHINGTON, DC, USA, September 5, 2018 /EINPresswire.com/ -- The Washington Construction Defect Center says, "We do not want a new homeowner anywhere in Washington State to get hit with an expensive repair bill because their home builder failed to fix what were legitimate home repairs listed on a punch list. In Washington State the home builder may have responsibility to repair defects within the first year of the new homeowner moving in. If you are a new homeowner in a single-family home subdivision or townhouse development anywhere in Washington State and the builder of your home is ignoring your requests to make needed repairs, please call us anytime at 866-714-6466. There may be additional repair issues you may not be aware of as we would like to explain."

<http://Washington.ConstructionDefectCenter.Com>

The Washington Construction Defect Center's initiative is specifically focused in on making certain homeowners in a new single-family home development or townhouse project do not get stuck with thousands of dollars in construction defect costs because their home builder did not make the needed repairs when they should have.

One of the biggest problem-with single family home subdivisions or townhouse projects in Washington State is homeowners rarely talk to each other or even know each other. It is very easy for a serious construction defect or defects in every home to not be discovered because the last thing homeowners typically will want to talk about are a leaking roof, plumbing issues or defective siding as the Washington Construction Defect Center would like to discuss anytime at 866-714-6466. <http://Washington.ConstructionDefectCenter.Com>

The Washington Construction Defect Center Would Like to Hear from Homeowners In New Subdivisions If They Have the Following Types of Problems:

- * Water leaks because of improperly installed or defective siding.
- * Improperly installed windows that create water leaks.
- * Exterior doors that were improperly installed that lead to water leaks.
- * Defective roofs that were improperly flashed or installed and or that have defective roofing material.
- * Severe foundation cracks or foundations that are not level.
- * Single family homes in newer subdivisions that now have mold because the building was not protected during the framing/drywall process.
- * Improperly installed or defective wood fascia board or wood trim.
- * Improper exterior caulking of exterior siding that leads to water leaks and mold.
- * Defective plumbing pipes

In Washington State, the statute of limitations for construction defects is six years from the issuance of the certificate of occupancy. The Washington Construction Defect Center is urging homeowners in

subdivisions not older than five years to call them anytime at 866-714-6466 if they have construction defect issues that the home builder failed to fix, or now refuses to fix.

The only catch is the home must be in a single-family home subdivision, or a multi-unit townhouse. The group's free services are available to homeowners in newer subdivisions throughout Washington

State including King, Pierce, Snohomish, Thurston, Skagit, Spokane, Clark, Kitsap and Whatcom C outies built after 2013. <http://Washington.ConstructionDefectCenter.Com>

The Washington Construction Defect Center will select one of the leading construction defect law firms in the State of Washington for a legal opinion and possible inspections to determine the seriousness of a construction defect or defects. The service is free to homeowners. <http://Washington.ConstructionDefectCenter.Com>

The group's initiative is focused in on making certain homeowners in a new single-family home or townhouse project do not get stuck with thousands of dollars in construction defect costs”
