

LogicalDOC introduces LogicalDOC 8.1 which has single sign-on feature

LogicalDOC introduces LogicalDOC 8.1 which has single sign-on feature

CARPI, ITALY, September 3, 2018 /EINPresswire.com/ -- LogicalDOC which has remained resolute in helping individuals and businesses efficiently manage their documents has released a new product into the market. LogicalDOC 8.1 builds on the strong features of previous offerings, but it comes with something extra. The Central Authentication Service (CAS) platform allows each user to sign in once and access as many documents and applications as they desire. The robust system recognizes the user as they migrate across different documents. One of the vital operating designs is that CAS does not access the user's password but uses an advanced mechanism to authenticate each sign-on.

The users' security credentials remain at the heart of all that people do online. When your password is

compromised, it can cause many negative experiences for the individual. Everything about the [single sign-on](#) feature of LogicalDOC 8.1 is centered on the need to bring convenience and safety in one unique swoop. It works only in secured HTTPS connections which makes it doubly safe for

“

Every phase of the product's development was geared to take care of the challenges that people face when they multi-task or have to access many relevant documents at a go.”

Marco Meschieri

even the first time users. A couple of experts who have test-run this solution attests to its viability and robust composition in serving the needs of a wide range of businesses and individuals.

The spokesperson of LogicalDOC, Marco Meschieri has stated that – “The single sign-on feature is one of the many things that we have designed in order to give added value to our users. It is essential to mention that we had the expert, the newbie and everyone in mind when we were coming up with this product. It has the 100% value-adding guarantee that makes the issue of [document management](#)

[software](#) enter into an even higher satisfactory level for the savvy consumer.”

It is important to mention that LogicalDOC currently enjoys International patronage which has helped to entrench its market dominance. The company has invested huge sums in research and

LogicalDOC

development in its bid to keep surpassing the needs and expectations of its teeming customers. At the last count, they have released dozens of document management solutions that have been enjoying positive reviews in the market.

The company is poised to retain its innovativeness by keeping tabs with the changing realities in today's business world.

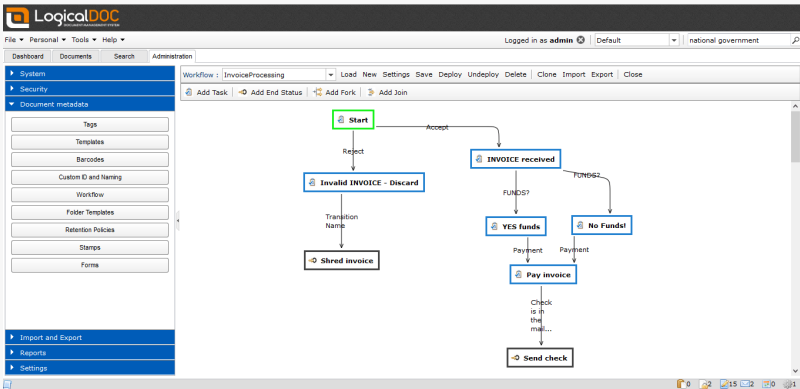

For more details about this latest [document management system](#) called LogicalDOC 8.1, you can visit this website - <https://www.logicaldoc.com>

The graphic features the LogicalDOC logo at the top, with the text 'DOCUMENT MANAGEMENT SYSTEM' below it. A large orange banner across the middle contains the text 'SECURITY SISTEMS' (sic). Below the banner is a close-up image of a metal padlock resting on a surface with a faint binary code pattern.

Security Paper

The screenshot shows the LogicalDOC Workflow Designer interface. On the left is a sidebar with navigation links: Dashboard, Documents, Search, Administration, System, Security, and Document metadata. The main area displays a workflow diagram for 'InvoiceProcessing'. The workflow starts with a 'Start' node, leading to a decision 'INVOICE received'. If 'FUNDSD?', it branches into 'YES funds' and 'No Funds!'. The 'YES funds' path leads to 'Pay invoice', which then leads to 'Send check'. The 'No Funds!' path leads to 'Shred invoice'. The 'Administration' menu is open, showing options like Tags, Templates, Barcodes, Custom ID and Naming, Workflow, Folder Templates, Retention Policies, Stamps, and Forms.
