

Fastest-Growing 3D Printing Devices Market Is Energy, A New Report Shows

LONDON, GREATER LONDON, UK, September 3, 2018 /EINPresswire.com/

-- Currently, the global energy industry is a smaller part of the 3D printing devices, services and supplies market than the other main segments, a report from [The Business Research Company](#) shows. The report, [3D Printing Devices, Services And Supplies Global Market Opportunities and Strategies To 2022](#) also shows,

however, that while the aerospace 3D printing devices market, the healthcare 3D printing devices market, the automotive 3D printing devices market, the industrial 3D printing devices market and the jewelry 3D printing devices market are all growing rapidly, the energy 3D printing devices market is growing fastest, increasing by a third every year. For the energy producers, as for the aerospace, automotive and industrial segments, the ability of 3D printing devices to bring mass customization, new capabilities, supply chain simplification and waste reduction is proving revolutionary. Due to the relatively simple technology, 3D printing devices decrease lead times and increase production speeds.

For the energy producers, as for the aerospace, automotive and industrial segments, the ability of 3D printing devices to bring mass customization, new capabilities, supply chain simplification and waste reduction is proving revolutionary. Due to the relatively simple technology, 3D printing devices decrease lead times and increase production speeds.

Due to the relatively simple technology, 3D printing devices decrease lead times and increase production speeds.

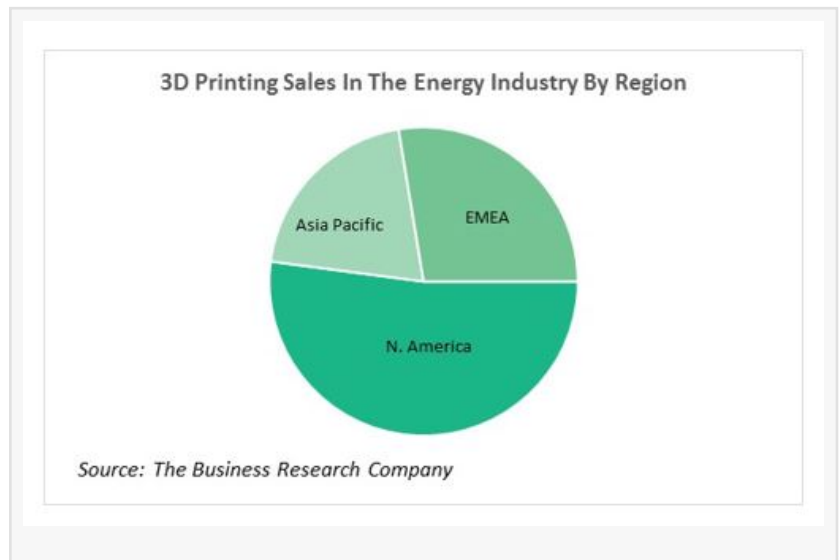

In 2022 the energy industry segment of the 3D printing devices, services and supplies market will be split among the Americas, Asia-Pacific and the EMEA (Europe, Middle East and Africa regions) as shown in the chart. Even though the Americas remains the biggest market in the world, its growth will be a little slower than Asia Pacific and EMEA. Asia-Pacific is expected to see the highest growth rate, at over 38% year on year.

The market for global 3D printing technology is characterized by the presence of well-diversified domestic and international players with a range of product and service offerings. The top three competitors in the 3D printing services market in 2017 were Materialise NV, Photo Labs Inc. and Gitim GmbH. These three companies made up about three quarters of the market with Materialise NV's share being over half of the market.

3D Printing Devices, Services And Supplies Global Market Opportunities and Strategies To 2022 is one of a new series of reports from The Business Research Company that provide a market overview, analysis and forecasts of market size and industry statistics, market growth rates, market trends, market drivers, market restraints, market revenues, market shares and company profiles of the leading competitors in over 300 industry reports, covering over 2400 market segments and 60 geographies. The industry reports draw on 150,000 datasets. Extensive secondary research is augmented with exclusive insights and quotations from industry leaders

obtained through interviews. Market analysis and forecasts are provided by a highly experienced and expert team of analysts and modellers.

Where To Learn More

Read 3D Printing Devices, Services And Supplies Global Market Opportunities And Strategies To 2022 from The Business Research Company for information on the following:

Markets Covered: 3D Printing Hardware Devices Market, 3D Printing Software Market, 3D Printing Services Market, 3D Printing Materials Market.

Data Segmentations: 3D Printing global and regional total and by product segments – hardware, software, services and materials 2014-22 market size and growth rates.

3D Printing Organizations Covered: D Systems Corporation, Arcam AB, The ExOne Company, Stratasys Ltd., EOS GmbH Electro Optical Systems, EnvisionTEC, Materialise NV, XYZprinting, SLM Solutions Group AG, M3D.

Regions: North America, Europe, Asia Pacific, ROW (Rest of world)

Time Series: 2014-16 actuals, 2017 estimates, 2018-22 forecasts.

Other Information And Analyses: Processes involved in 3D printing, global 3D Printer sales, market drivers, market challenges, market opportunities, company overview, business strategy, financial overview, products and services, SWOT analysis, recent developments, key executives for ten leading 3D technology companies.

Sourcing and Referencing: Data and analysis throughout the report are sourced using end notes.

Number of Figures: 40

Number of Tables: 33
