

Beyond Security Announces Hack2Win eXtreme at the beVX Conference in Hong Kong

Winner can collect up to \$500,000 USD in prizes

SAN JOSE, CALIFORNIA, UNITED STATES, September 4, 2018 /EINPresswire.com/ -- [Beyond Security](#), a leading provider for automated security testing solutions including vulnerability management announced that along with organizing security conference [beVX](#) in Hong Kong, taking place on September 20-21 this year, it will also be hosting its [Hack2Win](#) eXtreme contest that offers up to \$500,000 in prizes.

"We have decided to go big this year with Hack2Win eXtreme Contest, which will focus on two primary targets, browsers and mobile," said Noam Rathaus, CTO and Co-Founder of Beyond Security. "The first contestant to successfully compromise a selected target will win the prize money for that specific target in that particular category" he also added. For more information on Hack2Win eXtreme at this year's beVX conference, please visit <https://www.beyondsecurity.com/beVXcon/hack2win.html>

"Beyond Security is also proud to host beVX security conference in Hong Kong this year" said Aviram Jenik, CEO and Co-Founder of Beyond Security. "The conference focuses on highly technical offensive security topics such as vulnerability discovery, advanced exploitation techniques and reverse engineering and offers to be a great event for cyber security professionals"

For more information on beVX, please visit <https://www.beyondsecurity.com/beVXcon/>

Beyond Security is a leading worldwide security solutions provider. Its testing tools accurately assess and manage security weaknesses in networks, applications, industrial systems and networked software. Beyond Security's product lines include, beSECURE® for network vulnerability management, beSTORM® for software security testing, which can help secure network and applications and comply with the security policy requirements that exceeds industry and government standards and beSOURCE®, which is a highly accurate and easy to use static application security testing (SAST) solution that provides tools for identifying, tracking, security flaws such as security vulnerabilities, compliance issues in the source code. Beyond Security delivers fast and cost-effective PCI ASV compliance scanning and PCI compliance testing is built into every beSECURE® VAM implementation.
