

Science fiction and time travel fans will soon have something new to enjoy

An exciting book is creating a stir on Kickstarter

PHOENIX, AZ, UNITED STATES, September 4, 2018 /EINPresswire.com/ -- Science fiction and time travel fans will soon have something new to enjoy. "How to Build a Time Machine" is a marvelous book being funded on the Kickstarter crowdfunding website. The book is trending extremely well and is currently the most backed fiction project on the site.

This exciting book provides an enormous amount of intriguing information about time travel, self-resolving temporal causality, artificial and anti-gravity, an alien civilization called the Luyteni, fusion power generation, and detailed instructions on how to build a time machine.

The book is written from the perspective of two New York journalists who are contacted by one John J. Clifton, a "temporal specialist" from the year 2151. In addition to first-person interviews, Clifton provides future historical data files, as well as participates in a technical interview with a physicist and a mathematician.

Readers who enjoy true science fiction and contemplating the possibility of time travel will enjoy this work immensely.
