“Over the last decades, an unprecedented change in human lifestyles has been observed. These lifestyles brought some major health challenges that lead to adverse effects on individuals. Smoking and tobacco are such major habits which are increasing the prevalence rate of various respiratory diseases and cancer. Smoking is the principal cause of lung cancer. According to World Cancer Research Fund International, smoking is responsible for around 85% percent of all types of this cancer. Men who smoke are 23 times more likely to develop lung cancer. More than 1.8 million of new cases were diagnosed in 2012. An estimated 1.6 million deaths reported in 2012 which is extensively high when compared to 2002 deaths due to lung cancer. Approximately, 1.18 million deaths were recorded in 2002 which shows an increase of 34% over these years. About 58 percent of lung cancer cases accounted from less developed countries. Europe and North America recorded the maximum number of lung cancer incidences while Africa and, Latin America and Caribbean hold the lowest incidence of lung cancer. While, Hungary had the highest rate of lung cancer, followed by Serbia and Democratic People's

Republic of Korea. Additionally, as per American Lung Association, geriatric population has the maximum probability to be detected with lung cancer. 83 %percent of lung cancer patients were 60 years of age or older in the year 2013. In Europe, more than 410,000 new cases of lung cancer were diagnosed in 2012. Lung cancer is the third most common cancer in the UK during 2013-14. It accounts for 13% of all new cases. The region recorded approx. 46,400 new cases of lung cancer in 2014 and 130 cases diagnosed every day. Over the last decade, 4 percent increase in lung cancer incidence rates recorded. The key players in the lung cancer diagnosis and therapeutics market include AstraZeneca plc, Eli Lilly and Sanofi-Aventis, Arqule Inc, Daiichi Sankyo co. Ltd, Celgene, Merck, Pfizer, Ventana, Roche, Genentech, Glaxosmith, Boehringer, Novartis, Bayer, Bristol-Myers Squibb, Eisai, AbbVie, Pharmacyclics.

Global lung cancer diagnosis and therapeutics market by region is segmented into North America, Europe, Asia Pacific and rest of the world in which Asia Pacific region is growing at a significant rate due to rising incidence and prevalence of cancer awareness regarding chronic disease such as cancer. North America is dominating this market as the major market leaders are situated in this region. North America holds the significant market share of the global lung cancer diagnosis and therapeutics market, followed by Europe.
