

US is Leading the Containers and Packaging Industry with Market Revenues of \$250.55 billion

Global Containers & Packaging industry profile provides top-line qualitative and quantitative summary information including market size forecast to 2022

LEWES, DELAWARE, DELAWARE, UNITED STATES, September 10, 2018 /EINPresswire.com/ -- Global Containers and Packaging market has experienced steady growth over the last five years as slowing growth in European markets is offset by positive trends in terms of consumerism in the Asia-Pacific region. This will continue over the forecast period. The global market is driven by growing countries within the Asia-Pacific region, which makes up 44.1%, followed by the European market, which makes up 22.1%.

Flexible and rigid plastic are the most valuable segments in this market due to the increased demand for low cost, durable, lightweight and readily available materials. However, as the economies in emerging countries improve, an increase in consumerism will encourage growth in this market; however, significant growth will be capped by measures by the EU and other countries to cut down on excessive packaging and virgin materials to reduce waste.

Report

The containers and packaging market consist of packaging made of paper and card, plastic, metal and glass. It does not include packaging that is used only for transportation purposes such as wooden crates, pallets, steel drums etc. The market is valued in report at manufacturers'

The global containers and packaging market had total revenues of \$1,463,265.3m in 2017, representing a compound annual growth rate (CAGR) of 4.1% between 2013 and 2017."

selling prices (MSP), while market volumes represent offtrade retail consumption, meaning that on-trade channels such as hotels, restaurants and catering, as well as quickservice restaurants such as cafés and bars, are excluded. B2B sales and exports are also excluded.
