

AI at the heart of accelQ's powerful Continuous test automation & monitoring solution

SAN FRANCISCO, CALIFORNIA, U.S.,
September 10, 2018 /

EINPresswire.com/ -- accelQ (www.accelq.com) has embedded the power of AI at its core to cut down testing time by 70%. accelQ is the only test automation platform where AI drives automation processes across the software quality life cycle including test design, planning, test case authoring, test case generation and change management.

accelQ leverages sophisticated algorithms, machine learning and natural language processing to accelerate the test automation while making it simple and accessible to all. It helps automation engineers, manual testers, agile product owners and quality managers to enable in-sprint automation and truly align with continuous delivery.

accelQ's Natural language AI automation platform is available for a free; visit <https://goo.gl/SJTkhu>

In addition, accelQ has also seen tremendous success in process automation & functional monitoring with its AI based SmartMonitor solution. It enables constant and automatic monitoring of application business process delivery to its end users. The cloud based SmartMonitor solution monitors business continuity in production environments validating the functional accuracy of application processes and its data. This has made a significant impact for customers where application performance is the backbone of today's digital businesses.

"Continuous innovation is the driving factor behind accelQ's achievements and its vision. We are uniquely positioned to lead the market with capabilities and efficiencies of the likes never seen before. With growing complexities of micro-services, dynamic content, changing technology stack, accelQ's AI based approach simplifies the automation helping realize the ROI faster, and more importantly sustains the benefits" comments Guljeet Nagpaul, Head of Product Strategy at accelQ. "Automation can now cope up with the continuous delivery and the pace of application changes without getting stuck in vicious maintenance cycles"

About accelQ

accelQ is the only cloud based continuous testing platform today that seamlessly automates API and web testing without writing a single line of code. IT teams of all sizes use accelQ to accelerate their testing by automating critical aspects of lifecycle like test design, test generation and execution. accelQ drives automation with smart view recording coupled with powerful natural language automation to handle the most complex testing and automation requirements. Lowering the change and maintenance effort is where accelQ customers have saved 70%. accelQ makes this possible with AI powered core to bring self-healing automation amongst other unique capabilities.
