

# SPHERE Furthers Depth of Security Automation with Virtual Workers

*Virtual Workers Automates Complex Remediation Processes Across SPHERE's Flagship SPHEREboard Solution*

JERSEY CITY, NJ, UNITED STATES, September 11, 2018 / EINPresswire.com/ -- SPHERE Technology Solutions, a global, woman-owned cybersecurity business focused on improving security and enhancing compliance, announces the further development of Virtual Workers, an automated framework that will facilitate the remediation of complex data and provide better governance via the [SPHEREboard](#) platform.

SPHERE Virtual Workers are built to make firms more secure in less time and with fewer resources. The Workers deliver smart automation across various remediation processes including removing open access, pruning privileged access, certifying ownership, and performing asset reviews. As part of SPHEREboard, clients will be able to implement the Asset Review Module (ARM) alongside Virtual Workers to make remediations a simpler, less expensive, and less time consuming process.

“

The depth of automation we provide, furthered by the introduction of Virtual Workers, ensures that these are significantly less time-consuming and costly processes for our clients.”

*SPHERE President and Founder, Rita Gurevich*

“Remediation processes, while integral to solid data governance, can be a major strain on a firm’s resources,” says SPHERE President and Founder, Rita Gurevich. “The depth of automation we provide, furthered by the introduction of Virtual Workers, ensures that these are significantly less time-consuming and costly processes for

our clients.”

As part of SPHEREboard’s risk reduction workflow, the Unstructured Data Module (UDM) will provide risk reporting on sensitive data to create an action plan for remediation. Clients can flip to remediation mode to leverage the Asset Review Module (ARM) and Virtual Workers to automatically fix the issues, scheduling updates, remediating areas of high risk and targeting a firm’s most valuable assets.

About SPHERE Technology Solutions

SPHERE Technology Solutions is an award-winning, woman-owned cybersecurity business focusing on improving security and enhancing compliance. SPHERE puts the controls in place to secure your most sensitive data, create the right governance processes for your systems and assets, and make sure companies are compliant with the alphabet soup of regulations surrounding their respective industries.
