About HCX (Himalaya Capital Exchange): A [Security Token Issuance Platform](#)

Himalaya Capital Exchange is a project aimed at creating a tokenised platform for Initial Public Offerings (IPOs) on a global, borderless, stock exchange. The Platform As a Service eco-system would offer an alternative to

investment banks that are currently mandated to lead-manage IPOs, and give corporates,

governments, and other entities raising public capital a less costly, and more democratic option with instant access to global investors. We are giving entrepreneurs everywhere the chance to create their own shares and bonds, and raise money within minutes from across the world frictionlessly. The platform would run on smart contract algorithms and at a later point make use of Machine Learning and AI in matching and creating a marketplace. This will be a first of its kind securities marketplace governed by token holders. Currently HCX is backed by John Puttick (Founder and Chairman of GBST), Arun Sharma (Deputy Vice-Chancellor at Queensland University), Leanne Kemp (CEO of Everledger), Ghanshyam Dass (ex Director of NASDAQ & Board Member of KPMG), Mario Pazos (Pazos Law, USA) and others. Currently in private token sale before launching the public pre sale of tokens in 4Q 18.

Arifa Khan, CEO, is a crypto pioneer who authored the first ever Concept Paper on [decentralising capital markets](#) (June 2017) and inventor of security tokens. She later architected a platform ecosystem for capital markets participants in her revolutionary white paper published and presented to Nick Szabo on 25 May 2018. She founded HCX in 2017 - a decentralized stock exchange that runs trustlessly on smart contracts - to bring that vision to reality and travelled the world for a full

year to educate non crypto savvy people in remote corners, on the benefits of self-issuing security tokens. HCX is the first-of-its-kind disruption which automates the role of investment banks and empowers entrepreneurs around the world to issue their own security tokens. Arifa Khan is India Partner of the Ethereum Foundation and leads Ethereum's community development efforts in India & Middle East. She has an MBA from Wharton School of Business, and a B.Tech from IIT Madras. She is a sought-after international public speaker and has given keynote talks at several global forums such as Crypto Investor Show London, Bengaluru Tech Summit, D10e Davos, Ethereum India Summit, Blockchain UA Kiev, Blockchain & ICO Summit Istanbul, Hybrid Block Macau Summit, Himalaya Crypto Summit 2018. She is listed among Top

Democratising Capital Raising for Entrepreneurs Around the World

100 Fintech influencers by Lattice80.

John Puttick, CSO, is Founder and immediate Past Chairman of GBST, who has extensive commercial experience in building software platforms for capital market players. GBST is a global supplier to Global Investment Banks and Wealth Management Platform providers. GBST has a strong presence in Asia. John was responsible for bringing an array of innovative software solutions to the capital markets during an extensive career stretching from the crash of '87 through to the present. Notably, he is recognised for introducing the practices of straight-thru-processing for settlement of stock trades, workflow management, online trading, and multi-entity and multijurisdictional accounting to streamline back offices and substantially shorten settlement cycles. John is a recognised business leader who mentors fintech startups.

To bring this ambitious vision to life, HCX team also plans to augment its Security Token Exchange Platform (HCX) with an in-house fund dedicated to investing in Initial Security Token Offerings (ISTOs), where institutional investors are encouraged to take LP positions for equity. This would be a first of its kind vehicle for institutional capital to gain exposure to the upcoming security token wave, which represents a promise to identify future unicorns, and gain stakes in their legally protected shares and bonds, in a departure from the unregulated ICOs and tokens seen during the 2017 wave.

Token Storm, part of Zero Field Labs - a Blockchain play - aims to create the foundations of a new token economy ecosystem which will bring together the world's leading Blockchain startups along with key players in the crypto landscape spanning investors, innovators, developers, and crypto enthusiasts.

Token Storm provides global ICOs a platform to build community outreach in a global roadshow to create opportunities for education, on-boarding of users, and collaboration in the Blockchain ecosystem.
