Don Malloy Joins Us "In The Boardroom" To Discuss Symposium on Securing the IoT - October 29-31, 2018 Boston

NEW YORK, NY, UNITED STATES, September 13, 2018 / EINPresswire.com/ -- SecuritySolutionsWatch.com: Thank you for joining us today, Don, and congratulations on the growth and traction that you have achieved with the Symposium on Securing the IoT. Before discussing your series of events in greater detail, please tell us about your background and may we have a brief history regarding how you started this Symposium?

Don: Malloy: I was educated in Organic Chemistry worked as a Scientist in research for a few years then decided I needed to be more involved with people and received my MBA and transitioned to industry. I worked with sensor technology before there were connected devices and I also managed crypto-semiconductor chip product line. I was employed with both hardware and software authentication companies and that evolved into The Initiative for Open Authentication. The organization developed algorithms for multi factor authentication, that are

open source solutions and now they are ubiquitous. I began to concentrate on IoT a few years ago and found similarities; not enough security and standards that are not followed nor are compatible. There is not much interoperability between systems, gateways and devices. I would like to raise the awareness of the need for security and the solutions to the forefront of the industry.

SecuritySolutionsWatch.com: We are all familiar, unfortunately, with the headlines regarding breaches at Equifax, Uber and Orbitz and the recent ransomware attack on the city of Atlanta (https://www.cnn.com/2018/03/27/us/atlanta-ransomware-computers/index.html). What is your perspective, Don…are things getting better or getting worse? What do you feel are the most pressing problems in IoT…where is the greatest need for security?

Don: Malloy: A key issue is that security is not being designed in, usually it is an afterthought and removed due to the extra cost involved. I think things will continue to get worse before they get better. Critical issues revolve around major institutions including power plants and hospitals. Companies are beginning to get the message but still more than 50% of device users do not change the default password which may lead to remote takeover of the device. These vulnerabilities along with many others will cause governments to create additional laws and

regulations forcing adoption.

SecuritySolutionsWatch.com: The agenda of upcoming speakers (https://www.securingthenet.com/bios) and the companies they represent including Cisco, IBM, Siemens, and Verizon, just to name a few, is truly impressive. What do you hope to accomplish with the Symposium October 29-31, 2018 in Boston.

Don: Malloy: Our Boston Symposium will be a bit different from San Francisco, this time we will have more focus on authenticating Blockchain and security of health care devices. Our goal is to bring together the though leaders that will raise the awareness level of the need for increased security and highlight some of the solutions that are being developed by both startup and major enterprises.

SecuritySolutionsWatch.com: Who should attend Don and what are the main benefits of attending Symposium on Securing the IoT (https://www.securingthenet.com/) ?

Don: Malloy: The type of people who will benefit from attending the Symposium are: IT (CIOs and CISOOs) managers who will be monitoring and controlling these systems. engineers and developers of devices and systems, and users of these devices that are connected to the internet. The benefits include timely education and establishing relationships that will lead to collaboration of the brightest minds to better secure the world of connected devices.

SecuritySolutionsWatch.com: What's next for Symposium on Securing the IoT (https://www.securingthenet.com/) ...any other events lined up?

Don: Malloy: Yes, we will be returning to San Francisco on March 25th-27th, 2019 for our west coast version and plan on going back to the east coast next fall.

SecuritySolutionsWatch.com: Care to mention any of your sponsors and partners (https://www.securingthenet.com/sponsors) ?

Don: Malloy: Yes, we have Rivetz, Thales eSecurity, Dover Microsystems, Device Authority. Association partners include:
SecuritySolutionsWatch, EdgeX Foundry, Innovation Women, Open Connectivity Foundation, ZWave, Smart Insights and additional ones.

SecuritySolutionsWatch.com: Thank you again for joining us today, Don, any other subjects you'd like to mention?

Don: Malloy: I would just like to add that we are in a "Brave New World" and everyone needs to make an effort to secure their devices and systems both at home and in the workplace by changing passwords regularly, using a password manager, being sensitive to phishing and scam attempts, backing up your data on a regular basis and coming to Boston in October!

About SecuritySolutionsWatch.com

www.SecuritySolutionsWatch.com features thought leadership interviews about IT, IoT and security solutions. Our
flagship "In The Boardroom" program, now in its 15th year, has delivered outstanding content about solutions from leading global brands such as: 3M, AMAG Technology - A G4S Company,

ASSA ABLOY, Cisco Security, Cyberinc, Dell EMC, HP Cybersecurity, Fujitsu, Gemalto, HID Global, IBM, ImageWare, Intel, SAP, Siemens, Stanley Security, SONY, Unisys, and Yahoo, just to name a few.

What's YOUR authentication, cybersecurity, IoT, physical security, mobility, or "smart" solution?

What's YOUR Blockchain or FinTech solution?

We invite you to please join us "In The Boardroom" at www.SecuritySolutionsWatch.com.

For a quick tour to see exactly how your brand will be featured, please contact Ali Eng on our publishing team via
email: ALE@SecuritySolutionsWatch.com, or phone: 1+914.690.9351, or, LinkedIn:
