- Simple Steps - Photo Recovery from Memory Card

The memory card data recovery process is very simple. Please connect your memory card to computer and then follow the simple tutorial below on how to recover deleted photos from an SD card, which can be performed in just a few simple steps:

1. Download and install Recoverit Free from the Wondershare website:
<https://recoverit.wondershare.com/data-recovery-free.html>
2. Start the Recoverit program and select the "External Devices Recovery" from the recovery scenarios to process the next recovery step.
3. Ensure the memory card is inserted into your computer/laptop. Choose the memory card location to identify where you want to recover files from memory cards and click "Start".
4. Once initiated, the scan will take a while, depending on the size of the memory card. Once done, the recovered files will now be visible.
5. In case you are unable to find the photos you want after your first scan, you can opt for the All-Around Recovery mode, which will scan even more files.
6. When the search is complete, you will need to preview the scan results. Here you will see what files can be recovered. Pick the photo that you want to recover and then select where you want to store all the recovered data on your computer or laptop.

How to Obtain the Software Online

The Recoverit Free software can be downloaded on the Wondershare website, which allows users 100MB of data recovery for free. For additional recovery data, Recoverit Pro offers unlimited data recovery for only \$39.95 per year. And Recoverit Ultimate can recover data even though the PC crashes or unable to boot for only \$59.95 per year.
