

Global 3D Concrete Printing Market Research and Forecast 2018-2023

Global 3D Concrete Printing Market, Size, Share, Market Intelligence, Company Profiles, Market Trends, Strategy, Analysis, Forecast 2018-2023

INDORE, INDIA, September 27, 2018 /EINPresswire.com/ -- According to the OMR analysis, the global 3D concrete printing market is projected to exhibit a significant growth during 2018-2023. The growth of the market is attributed to rapid urbanization and industrialization in emerging economies such as India and China. Moreover, the implementation of more sophisticated design along with the minimal requirement of labor for the construction process are some of the driving factors of the market. The global 3D concrete printing market is segmented on the basis of offering, [technology](#), concrete type, product type, end users, and geography. The report provides detailed and insightful chapters on market overview, key findings, strategic recommendations, market estimations, market determinants, key company analysis, market insights, [company profiling](#), market segmentation, geographical analysis, and analyst insights.

“

Rapid industrialization and urbanization in the emerging economies; a growth catalyst for 3D concrete printing market”
OMR Analyst

Full report of global 3D concrete printing market is available at: <https://www.omrglobal.com/industry-reports/3d-concrete-printing-market/>

“High economic growth in APAC such as China, India and Japan are the major factors paving the growth of the global 3D printing market. Economic liberalization in India, Abenomics in Japan, and various development reforms initiated in China are some of the major causes of industrialization and urbanization in APAC. According to

International Monetary Fund (IMF), India’s growth forecast for 2018 has been raised to 1.1% from the economic status of 2016. Moreover, the expansion has been raised to 1.2% in Japan’s economic growth for 2017, owing to the support from expansionary fiscal policy in the country. According to India Brand Equity Foundation (IBEF), the Indian construction industry’s market size is estimated to be around \$37.6 billion in 2016 and employs a workforce of around 32 million. The growing construction sector is expected to provide growth opportunity for the 3D concrete market across the globe.

The report studies the global 3D concrete printing market from a geographical stance and segments into North America, Europe, Asia-Pacific, and Rest of the World. North America held a dominant position in the global 3D concrete printing market in 2017. Rapid industrialization and construction activities in the region along with development of innovative construction materials are some of factors that are significantly contributing in the market growth in the region. Asia-Pacific is projected as the fastest growing region in the global 3D concrete printing market over the forecast period. Rising population and rising disposable income in the region have led to a major rise in the construction sector in Asia-Pacific. This, in turn, is the major factor providing a growth opportunity for the 3D concrete market in the region.

The report covers:

Comprehensive research methodology of global 3D concrete printing market

This report also includes detailed and extensive market overview with key analyst insights

Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations

Analysis of regional regulations and other government policies impacting the global 3D concrete printing market

Insights about market determinants which are stimulating the global 3D concrete printing market

Detailed and extensive market segments with regional distribution of forecasted revenues

Extensive profiles and recent developments of market players
