

Is the Nordic Region Leading Connectivity Safely?

COPENHAGEN, DEMARK, September 17, 2018 /EINPresswire.com/ -- The Nordics have embraced technology like no other. Sweden, for example, has the world's highest number of smart devices per capita (1,5) and has bred the second highest number of Unicorns, globally, in the last decade. But high connectivity demands thorough digital protection, which isn't easy to establish. [NordX](#) will rise to the challenge in Copenhagen, February 12-13, as Qatalyst Global's inaugural cyber security summit dedicated exclusively to the Nordic region.

NordX
SECURING THE NORDIC REGION
FROM CYBER THREATS

12th - 13th February 2019
Copenhagen, DK // Venue: Radisson Blu Scandinavia Hotel
www.cyberseries.io/nordx

Register now & Save 40% until September 30th

NordX brings all aspects of cyber security to the table, from prevention to response. Senior IT security experts will approach the region's core challenges through on-stage interviews, keynotes presentations, panel discussions, and informal networking sessions. In this era of increasing digital disruption, attendees will benefit from extensive knowledge about the most effective and innovative cyber security solutions available today.

Key themes of this year's [agenda](#) include:

- Most cost-effective solutions to data protection
- Analysis of current and upcoming cyber threats
- The implications of government regulations

The most senior executives from the likes of Deloitte, Tieto, Sopra Steria, CGI, Technical Research Centre of Finland, and Stora Enso, have collaborated with Qatalyst Global to create this summit's agenda. It is content-driven and tailored for corporate IT leaders from across the region's largest industries, such as Oil & Gas, Banking, Retail, Healthcare, Energy, and Transport.

"I have come across a fascinating wealth of perspectives and approaches to cyber security with the Steering Committee, which is reflected in the summit's panel discussions. My personal favourite is the juxtaposition of financial and technological boundaries of cyber security, which will spark quite a debate on how much can vs. how much should be secured" –Event producer.

A limited number of NordX passes are still available at the early bird rate of 449 with 40% off until September 30th 2018. [Secure your place](#) at NordX today.
