

Occupational Health & Safety Management System Software major MyEasyISO announces ISO 45001:2018 capabilities

ISO 45001:2018 standard which replaced BS/OHSAS 18001:2007 has received a major implementation support with MyEasyISO's announcement of 100% compliance.

NEW YORK, NY, UNITED STATES, September 17, 2018 /EINPresswire.com/ -- Global GRC software

“

MyEasyISO is one of the top 5 GRC software in the domain of occupational health & safety compliance with an attractive price point that is as low as 10 US \$ per user per month.”

D. Shanker

leader MyEasyISO which already has a strong market leadership in the occupational health & safety management system automation in line with OHSAS 18001:2007, today announced that the MyEasyISO QHSE platform now aligns 100% with ISO [45001:2018 standard](#). This means that organizations that are implementing ISO 45001 for the first time or those moving from OHSAS 18001:2007 to ISO 45001:2018 can optimize their implementation, certification and maintenance with MyEasyISO.

An effective implementation of occupational health & safety management system needs commitment of the top management, enabling work environment, user friendly processes and a robust monitoring system.

Manual approach to occupational health & safety management system fails to address all or some of the above core components and result is poor health safety performance, lower employee motivation, higher incidents and compliance obligations violations.

One of the biggest reasons identified is the use of traditional, bureaucratic and paper based management system which is not only time consuming but also difficult to manage.

MyEasyISO offers a complete and the most powerful platform to plan, implement, monitor and improve OH&SMS across the organization. An intuitive, user-friendly, always accessible, collaborative, always audit ready and cost-effective software delivers what it is expected to do - a better safety culture and OH&S performance.

MyEasyISO covers the entire set of mandatory and recommended requirements of the ISO 45001:2018 standard including but not limited to the below areas:-

- The context of the organization,
- Risks & opportunities,
- Hazard and risk assessment,
- Emergency preparedness planning & response management,
- Compliance obligation management,
- PPE management,
- Work permit management,
- Hazardous material management,
- MSDS management,
- Waste management,
- Incident / accident management,

- Inspection management,
- Policy and objective management,
- KPI management,
- Training management,
- Calibration management,
- Documented information management,
- Internal audit management
- Management review management and more

10,000 + organizations across 120+ countries use MyEasyISO to manage and optimize their occupational health and safety management system.

Speaking on the occasion, Mr. D. Shanker: Director - Product Development said that "This a major milestone for our organization and testimony of our commitment to global occupational health & safety industry which is reflected through our regular product innovation to address changing business and compliance requirements". D. Shanker also highlighted a few other enhancements and product launches in the pipeline. " [MyEasyISO Pro](#) will be released in December 2018. It is a unique and first of its kind of BPMN based QHSE workflow automation framework that will offer customization and automation like never before in quality - occupational health & safety - environment compliance domain." added Shanker.

Users can get free trial of the software for 30 days by visiting <https://www.MyEasyISO.com>

MyEasyISO also announced a well anticipated service offering during this occasion - Complimentary ISO 45001:2018 consulting and ISO 45001:2018 certification services to its large enterprise subscription customers. Under this plan, customers will get free implementation consulting services and post implementation, MyEasyISO will pay for the audit charges and certification cost of the customer. A minimum savings of 4,000 US \$ is expected through this service which has created ripples in the [ISO 45001 consulting and certification](#) circles.
