

Asia Pacific's Electronic Manufacturing Industries Offer The Industrial Gas Industry Good Opportunities, New Research

LONDON, GREATER LONDON, UK, September 18, 2018 / EINPresswire.com/ -- Asia Pacific's industrial gas market is the largest in the world, as revealed by a new report from [The Business Research Company, Industrial Gas Global Market Opportunities And Strategies To 2021](#). Asia Pacific's large market size can be attributed particularly to the large number of electronic manufacturing companies in the region, especially in countries such as China, Japan, Singapore, Malaysia and Thailand. North America's industrial gas market is the second largest in the world.

Download a sample of the report at <https://www.thebusinessresearchcompany.com/sample.aspx?id=798&type=sample>

The Asia Pacific industrial gas market is expected to grow rapidly from 2017 to 2022, owing to the expected increase in demand from the electronics industry in the region, while growth in North America will be much slower. Large scale investments to increase production capacity by companies such as Semiconductor Manufacturing International Corporation (SMIC), Sony, Toshiba, and Micron Memory are expected to drive this growth of the Asia Pacific industrial gas market. For example, Taiyon Nippon Sanso Corporation has started an electronics gas manufacturing plant at Yangzhou Chemical Industry Park (YCIP) in China in order to take advantage of the increasing demand for electronics gases in Asia Pacific especially in China.

The industrial gas industry comprises primarily manufacturers of industrial organic and inorganic gases in compressed, liquid, and solid forms. The industrial gas industry is segmented by type of gas. Segments include the industrial hydrogen gas industry, the industrial oxygen gas industry, the industrial carbon dioxide industry and the industrial nitrogen industry.

Industrial Gas Global Market Opportunities And Strategies To 2021 is one of a series of new industry reports from The Business Research Company that identify opportunities and explain strategies in a range of industries, provide a market overview, analysis and forecasts of market size and industry statistics, market growth rates, market trends, market drivers, market restraints, market revenues, market shares and company profiles of the leading competitors in over 300 industry reports, covering over 2400 market segments and 60 geographies. The industry reports draw on 150,000 datasets. Extensive secondary research is augmented with exclusive insights and quotations from industry leaders obtained through interviews. Market

analysis and forecasts are provided by a highly experienced and expert team of analysts and modellers.
