# Global Medical Image Analysis Software Market Research and Forecast 2018-2023

Global Medical Image Analysis Software Market, Size, Share, Market Intelligence, Company Profiles, Market Trends, Strategy, Analysis, Forecast 2018-2023

INDORE, INDIA, September 27, 2018 /EINPresswire.com/ -- According to OMR analysis, the global medical image analysis software market is expected to grow significantly during the forecast period 2018-2023 due to the significant prevalence of chronic diseases. Additionally, the global medical image analysis software market is segmented on the basis of software type, image produced, modality, application, end-user and regional outlook. The report provides detailed & insightful chapters which include market overview, key findings, strategic recommendations, market estimations, market determinants, key company analysis, market insights, company profiling, market segmentation, geographical analysis, analyst insights and predictive analysis of the market.

MEDICAL IMAGE ANALYSIS SOFTWARE MARKET

BY TYPE OF IMAGE PRODUCED
- 4D Image
- 3D Image
- 2D Image

MARKET PLAYER
- Agfa–Gevaert Healthcare
- Aquilab GmbH
- Bruker Corporation
- Canon Medical System Corporations
- Carestream Health Inc
- Claronav, Inc.
- Esaote SPA
- Fujifilm Holding Company
- GE Healthcare

REGIONAL ANALYSIS
- ROW
- APAC
- NORTH AMERICA
- EUROPE

MOTIVATORS
- Rise in prevalence of chronic diseases
- Extensive use of computer aided diagnostic methods
- Increased investment in imaging equipment
- Increase in injuries due to vehicle accidents globally
- Rising adoption of digital pathology

> Rising prevalence of chronic diseases stimulating the global medical image analysis software market"
> *OMR Analyst*

Rising prevalence of chronic diseases are primarily driving the global medical image analysis software market. According to the American College of Cardiology, there were an estimated 422.7 million prevalent CVD cases in 2015. According to the World Health Organization (WHO), CVDs are the leading cause of death across the globe as more people lost their lives due to CVDs compared to any other cause. It was estimated that 17.7 million people died from CVD in 2015, which represents 31% of total deaths globally. Of these deaths, an estimated 7.4 million were due to coronary heart disease and 6.7 million, due to stroke. More than three-quarters of CVD deaths occur in low and middle-income countries, showing a lack of awareness about CVD in the country. Medical image analysis software enables the extraction of meaningful information that supports disease diagnosis. In addition, cardiac MRI analysis allows the study of structural abnormalities, tissue composition, blood perfusion and contractile function of the heart muscle. All these essential aspects enable to diagnose heart

disease and opt for plan and guide therapy. Hence, such rise in the prevalence of CVD is expected to fuel the global medical image analysis software market to get magnified view to understand the causes of health concern. This enables to increase the effectiveness and efficacy of patient's care and leads to accurate and rapid diagnosis.

The report covers:
Comprehensive research methodology of Medical Image Analysis Software Market
This report also includes detailed and extensive market overview with key analyst insights.
Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.
Analysis of regional regulations and other government policies impacting the Medical Image Analysis Software Market
Insights about market determinants which are stimulating the Medical Image Analysis Software Market
Detailed and extensive market segments with regional distribution of forecasted revenues.
Extensive profiles and recent developments of market players.
