“

Government initiatives and programs to raise awareness among people is augmenting the growth of breast imaging market”  
*OMR Analyst*

Full report of global breast imaging market is available at: <https://www.omrglobal.com/industry-reports/breast-imaging-market/>

Global breast imaging market on the basis of non-ionizing imaging technologies is bifurcated into breast MRI, breast ultrasound, optical imaging and breast thermography. Ultrasound uses high-frequency sound waves through women’s breast and converts them into images on a screen. In this technique a sound-emitting probe placed on

the breast to conduct the test. Ultrasound imaging technology produces pictures of the inner body using sound waves. This method is also known as ultrasound scanning or sonography that comprises the use of ultrasound gel and a small transducer (probe) placed directly on the skin. The transmission of high-frequency sound waves is done by the probe through the gel into the body. The sounds that bounce back collected by the transducer and these sound waves create an image using computer. This method doesn’t use ionizing radiation (as used in x-rays), so there is no radiation exposure to the patient.

The global breast imaging market on the basis of geography is divided into – North America, APAC, Europe, and Rest of the world. North America is expected to hold the dominant position globally. The availability of developed technology and healthcare infrastructure in the North American region is contributing for the market growth in this region. In addition, growing prevalence of chronic diseases is another major factor for the growth of breast imaging market in North America. Asia Pacific market is expected to grow with the highest CAGR during the forecast period of 2018-2023. The market in Asia Pacific is driven by increasing prevalence of breast cancer coupled with changing lifestyle.

The report covers:

Comprehensive research methodology of global breast imaging

This report also includes detailed and extensive market overview with key analyst insights.

Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the global breast imaging market.

Insights about market determinants which are stimulating the global breast imaging market.

Detailed and extensive market segments with regional distribution of forecasted revenues.

Extensive profiles and recent developments of market players.
