“

Advancement in technology is augmenting the growth of blood screening market”
OMR Analyst

The global blood screening market on the basis of technology is bifurcated into nucleic acid amplification test, western blotting, enzyme-linked immunosorbent assay and PCR-RNA. Enzyme linked immunosorbent is a test that detects and measures antibodies in blood to determine whether a person has antibodies regarding some infectious conditions or not. This test can be used for the diagnosis of several diseases such as of HIV, Lyme

diseases, anemia and rotavirus. This method is designed for handling large number of samples simultaneously due to which it is largely adopted for the evaluation of various research and diagnostic targets.

The global blood screening market on the basis of geography is divided into – North America, APAC, Europe, and Rest of the world. North America is expected to hold the largest share followed by Europe. The presence of advanced [healthcare](#) technologies in the North American region is contributing for the market growth in this region. In addition, growing infectious disease is another major factor for the growth of blood screening market in North America. Asia Pacific

market is expected to be the fastest growing market during the forecast period of 2018-2023. The market in Asia Pacific is driven by rapid development in the healthcare infrastructure and increasing awareness about blood donations.

The report covers:

Comprehensive research methodology of Global Blood screening market

This report also includes detailed and extensive market overview with key analyst insights.

Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the Global Blood screening

Insights about market determinants which are stimulating the Global Blood screening

Detailed and extensive market segments with regional distribution of forecasted revenues.

Extensive profiles and recent developments of market players.
