

# Business Opportunities and Market Outlook for Next Generation OSS and BSS revealed by Mind Commerce

*Most Comprehensive coverage of NGN OSS/BSS including 5G, Data Analytics, and IoT from 2018 to 2023*

SEATTLE, WA, USA, September 19, 2018 /EINPresswire.com/ -- Next Generation Network (NGN) Operational Support Systems (OSS) and Billing Support Systems (BSS) are required for a myriad of different reasons including OSS/BSS rationalization, next generation IP communications, and entirely new business models for Communication Services Providers (CSP) such as CSP support of various third parties including Over-the-Top (OTT) service providers.

CSPs have been upgrading their legacy OSS/BSS capabilities for many years. However, continuous enhancements are required as new networks, applications, services, and entirely new business models are emerging. For example, IoT Billing and Settlement represents a significant near-term growth area for Next Generation OSS/BSS. Longer-term, IoT Authentication and Authorization and the use of Blockchain will also emerge as a key area reliant upon NGN OSS.

NGN OSS/BSS will be critical for support of 5G for many reasons including facilitation of massive IoT deployment as well as QoS enforcement and billing for network slicing. This research includes detailed forecasts for 5G IoT, Network Slicing, and revenue outlook for NGN OSS/BSS for these and other emerging market opportunities. The global NGN OSS/BSS revenue outlook for 5G networks alone is \$6.3 billion by 2023, growing at a CAGR of 45.3%. At the regional level, the Asia Pacific market is anticipated to lead with market value reaching \$22.5 billion by 2023.

5G and IoT are Major Growth drivers for the NGN OSS BSS Market”  
*Mind Commerce*

Building upon Mind Commerce coverage beginning in 2007, the report [Next Generation Network OSS & BSS Market Outlook and Forecasts 2018 – 2023](#) provides the most comprehensive coverage of NGN OSS/BSS including

opportunities driven by 5G, Data Analytics, and IoT.

The report provides comprehensive analysis of the drivers and issues related to the technical and business aspects of the [Next Generation Network OSS BSS market](#), deployments and operations issues, and quantitative analysis with forecasts for anticipated growth through 2023

including IoT Platforms, IoT OSS/BSS, and IoT Data Management.

## About Mind Commerce

Mind Commerce is an information services company that provides research and strategic analysis focused on the Information and Communications Technology (ICT) industry. Our ICT reports provide key trends, projections, and in-depth analysis for infrastructure, platforms, devices, applications, services, emerging business models and opportunities.

We focus on key emerging and disintermediating technology areas for service providers, technology providers, developers (communications, applications, content, and commerce), systems integrators and consultants, government organizations and NGOs, and the financial community.
