

MENTIS named to DBTA 100 2018

Data and application security pioneer included in DBTA's Top 100 companies for its vision and innovation in delivering products and services to the marketplace.

NEW YORK, NY, USA, September 20, 2018 /EINPresswire.com/ -- MENTIS today announced its inclusion by Database Trends and Applications in its 6th annual DBTA 100 - The Companies That Matter Most in Data. This list assesses a wide variety of hardware, software, and services companies that are providing solutions for a rapidly evolving marketplace. MENTIS, the pioneer in data and application security solutions, has been providing enterprise customers around the globe with solutions to help secure sensitive data and meet regulatory compliance requirements since 2004. Headquartered in New York, MENTIS has offices in the US, India, and Latin America, and is expanding its footprint

“

Inclusion in this list speaks directly to our continued innovation with products that anticipate tomorrow's needs.”

founder and CEO of MENTIS*

with offices in Europe.

Rajesh Parthasarathy, founder and CEO of MENTIS commented, “We are pleased that DBTA continues to recognize MENTIS' achievements by including us in the DBTA 100 for the second year in a row. Our focus is partnering with our customers to help them meet the everyday challenges of data governance. They need to put their data to work for them, so availability, performance, and the ability to securely move data is paramount. Inclusion in this list speaks directly to our continued innovation with products that anticipate tomorrow's needs. Our solutions are designed to bring added value to data-driven businesses and as the market evolves, we will continue to break new ground.”

Suresh Sundaram, Executive Director at MENTIS, added, “Whether application specific or as an enterprise-wide platform, MENTIS' cutting-edge data security solutions enable compliance enforcement, cross-border data access, test data management, and security for sensitive data in cloud applications and data warehouses – with the focus of delivering business value.”

In its announcement, DBTA stated, “The IT landscape has become more complex—and that trend is certainly continuing. However, innovative vendors are helping to point the way forward with technologies and services to take advantage of the wealth of data that is pouring into companies.”

DBTA added, “With a mission to keep enterprise-sensitive data safe along the full information lifecycle, MENTIS offers data security solutions including discovery, static, and dynamic data masking, continuous monitoring, and retirement solutions for meeting a range of security and compliance mandates.” DBTA goes on to note that MENTIS has in-built separation of duties, allowing stakeholders across the IT, business, and security and compliance groups to collaborate for comprehensive and consistent data security.

ABOUT MENTIS

Founded in 2004, MENTIS has been in the data security field for close to 14 years now. With a product suite offering security solutions for data security throughout the sensitive data lifecycle, MENTIS has established itself as a force to reckon with in this space.

MENTIS' sensitive data security solutions proactively tackle sensitive data risk along the full information lifecycle. In addition to the company's ground-breaking discovery solution for sensitive data, the platform also includes static and dynamic data masking, continuous monitoring, and retirement solutions for meeting security and compliance mandates. Over the years, MENTIS has been recognized by reputed analysts like Gartner and Bloor for their innovative products and comprehensive data and application security solutions. A few of MENTIS' clients today include one of the top two Swiss banks, a multinational conglomerate based in the US, a leading airline service provider in Canada and many more.
