

Silent Breach Announces New Continuous Shield Protect Solution for Retailers

Continuous monitoring and breach response tailored for the Retail industry.

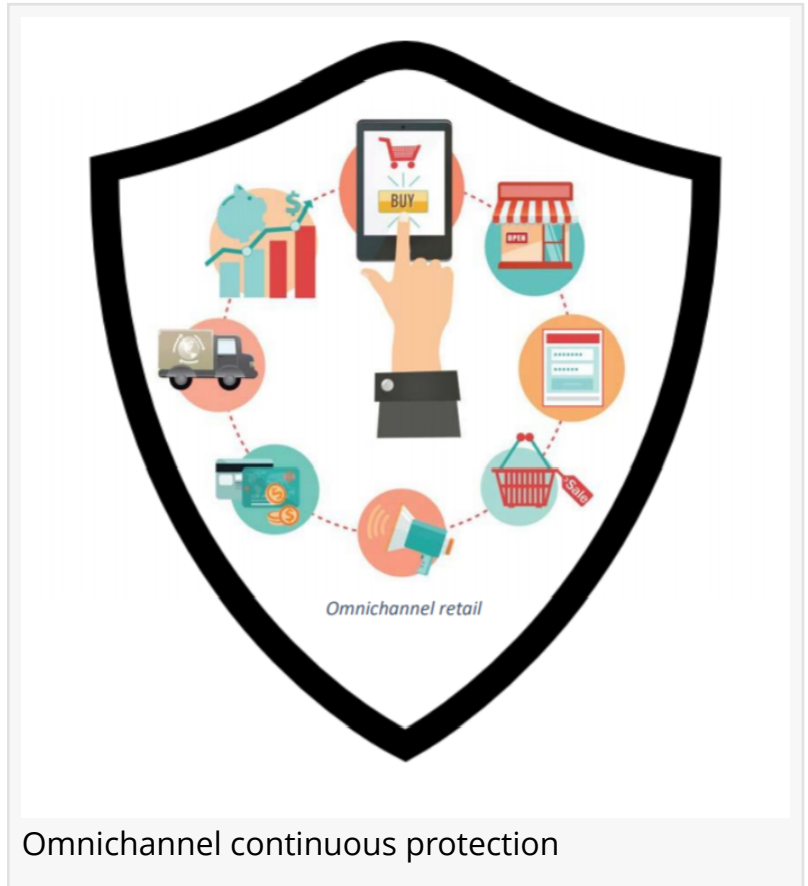

ST. PETERSBURG, FL, UNITED STATES, September 20, 2018 /EINPresswire.com/ -- Silent Breach (<https://silentbreach.com>), a leader in cyber security "red team" penetration testing, vulnerability assessment, continuous monitoring and incident response, has announced the release its new [Continuous Shield Protect solution for Retail](#).

"The past year has witnessed an array of successful cyber-attacks against some of the most prominent retail institutions in the world. These breaches, which affected approximately 353 million customers collectively, were spectacular not only because of their size, but also because of the relentless pace at which they seemed to occur," says Samuel James, Retail sales manager for North America. "The threats are obviously becoming more sophisticated. Because of the innovation retailers deliver to reach customers - omnichannel approaches, social media, efficiency efforts - the way we work is very different than other industries, and the way we worked a decade ago. While that presents great opportunities, it also raises the stakes of the game."

“

Innovation retailers deliver to reach customers - omnichannel approaches, social media, efficiency efforts - presents great opportunities, but also dramatically increases their attack surface."

Marc Castejon - CEO Silent Breach

Omnichannel continuous protection

Marc Castejon, Silent Breach CEO adds: "Compliance is very different from risk management, there is a growing awareness that compliance is the bare minimum for combating cyber threats, and that retailers need a more proactive approach, geared toward the industry's changing risk posture. Breach response readiness is also top of mind as retailer's scramble to detect threats, they are well aware that it's not a matter of 'if' but 'when' they will run into a security incident."

Silent Breach brings experience and expertise in more than 10 different industries, with offices in more than 15 countries, and teams spread out in all 24 time zones, allowing for around the clock continuous pro-active

monitoring and 24/7/365 incident response.

Silent Breach (<https://silentbreach.com>) is the premier provider of cyber security for the fortune 500 companies, in the Data Center, Enterprise, SME, Retail, Government, Finance, Education, Automotive, Hospitality, Healthcare and Internet of Things (IoT) industries.
