“

Digitization in healthcare system is fueling the growth of electronic health records market”

OMR Analyst

Full report of global electronic health records market is available at: <https://www.omrglobal.com/industry-reports/ehr-electronic-health-records-market/>

There is substantial growth in demand for healthcare services such as electronic health records due to aging populations and the increasing prevalence of chronic diseases. Concurrently, there are cost pressures originated due to rising need for higher quality work with fewer

available resources. Expectations for better outcomes, higher quality treatment and more value from the healthcare services provided raise the need for point-of-care access to medical data and the parallel evolution and adoption of mobile devices, for both medical staff and for patients. This in turn is increasing the need for IT systems to be adapted. Additionally, the significant increase in digitization of medical records and emergence of digital outputs from scanning and monitoring devices provide more voluminous and varied digital data to maximize the potential benefit of cloud solutions.

The global electronic health records market on the basis of geography is divided into – North America, APAC, Europe, and Rest of the world. North America is expected to have the largest share. Europe is expected to witness lucrative growth. In addition, government regulations in emerging economies to encourage healthcare providers for the adoption of EHR systems contribute in the growth of Asia-Pacific market. The market in Asia-Pacific is expected to grow with the highest CAGR during the forecast period of 2018-2023.
